

Benchmark Administration – Definitions

1 Introduction

The London Metal Exchange (“**LME**”) is a world centre for the trading of industrial metals and provides pricing, risk and terminal market services to the global physical metals industry. LME publishes various prices that fall within the definition of “benchmark” pursuant to the European Benchmarks Regulation (Regulation (EU) 2016/1011) (“**BMR**”).

This document sets out the key definitions and terms used in connection with benchmarks that are administered by the LME, in its capacity as Administrator. As defined below these terms are common across all of the benchmarks administered by the LME. They are not exhaustive, and should be read in conjunction with the benchmark-specific terms that are defined within each LME benchmark statement and each benchmark methodology, as applicable.
