Directors and independent auditors

Directors

The Directors of The London Metal Exchange (the Company or the LME) who were in office during the year and up to the date of signing the financial statements were:

G H Evans, CBE (Chairman)	
A N Aguzin	(appointed 17 June 2021)
L M L Cha	
M J Chamberlain	
R Lamba	(resigned 31 December 2021)
R Leung	
Dr H V Stiegel	
A J Stuart	
S K W Yiu	
J M M Williamson	(appointed 6 September 2021)

Registered office

10 Finsbury Square, London EC2A 1AJ

Independent auditors

PricewaterhouseCoopers LLP
7 More London Riverside, London, SE1 2RT

The London Metal Exchange

Strategic report

The Directors present their Strategic report on the Company for the year ended 31 December 2021. This report should be read in conjunction with the Directors' report on pages 9 to 12.

Overview

The Company is incorporated in the United Kingdom, and is an indirect subsidiary of Hong Kong Exchanges and Clearing Limited (HKEX), a leading global financial market operator.

Principal activities

The LME is the world centre for industrial metals trading. The main activity of the Company is the provision of a market place to facilitate trading, administrative and other services to the members of the LME (hereinafter referred to as members and the term "member" shall be construed accordingly). The Company is required to maintain proper standards in accordance with its Rules and Regulations and with regulations made under the Financial Services and Markets Act 2000 as regards business conducted on the LME.

Review of the business

In January 2021, the Company published a discussion paper on future market structure that considered proposals to facilitate modernisation of the LME and to create a metals market that is fit for the future, adapting to the needs of its evolving customer base and expectations from wider stakeholders. The proposals aimed to achieve increased transparency and a structurally fairer and more efficient marketplace, building on the groundwork of the principles identified in the Company's 2017 Strategic Pathway.

Following market feedback on the discussion paper, the Company re-opened the Ring for trading the LME Official Price on 6 September 2021. The LME Closing Price will remain electronically determined via LMEselect. The Company announced its intention to further enhance its electronic Closing Price methodology and formed the Closing Price Working Group, comprising a broad range of market users, to ensure that the methodology continues to best reflect customer needs. The Company also announced its intention to introduce a set of solutions to enhance electronic liquidity, taking on board the feedback received from discussion paper respondents. The Company committed to undertake a feasibility study into a possible hybrid contingent / realised variation margining methodology, and to make further enhancements to off warrant stock reporting.

Throughout 2021 the Company has continued to invest in its global physical ecosystem and successfully launched its electronic warranting solution in March 2021, replacing paper warrants. This new model streamlines the lodgement and withdrawal process for warrants, introducing more efficiency and reducing the cost of operations.

In August 2021, the Company launched LMEpassport, a centralised digital register that stores electronic Certificates of Analysis (CoAs) and sustainability credentials for LME-listed metals. Moving the physical transfer of these documents to a digital service provides efficiencies and digitisation to stakeholders throughout the metals trading and warehousing lifecycle. LMEpassport has seen strong uptake from the market with more than 1 million records created in the system from 17,000 CoAs, and more than 80 users accessing the platform in 2021.

LMEpassport also provides a platform for sustainability certifications and disclosures, which allows valuable information relating to the ethical and metallurgical provenance and production of metal to be robustly stored and distributed. The Company launched the first publication of such disclosures in October 2021 with nine producers of LME-listed brands choosing to publicise aspects of their sustainability work. To support this, following collaboration with market stakeholders, the Company has also developed a sustainability taxonomy, which provides LMEpassport users with a straightforward categorisation framework, making it easier to navigate the wide range of sustainability-related focus areas across metals.

In October 2021, the Company announced its partnership with Metalshub, a digital procurement platform for raw materials. This partnership focuses on helping promote sustainability, transparency and increased efficiency in the base metals markets. Moreover, the Company intends to use the platform as a price discovery venue for premiums to LME prices, helping further embed LME prices whilst creating new price indices which facilitate enhanced risk management.

The London Metal Exchange

Strategic report (continued)

Review of the business (continued)

The Company launched six new cash-settled futures contracts launched in July 2021, four of which have seen active trading to date. These new contracts included a lithium contract to serve the needs of the growing battery materials sector, additional aluminium products, and additional steel contracts to complement the existing suites.

There have been no significant regulatory developments affecting the Company in 2021. The Company will continue to closely monitor and engage with UK authorities as they implement changes to financial regulations in a post-Brexit environment.

Reform and replacement of benchmark interest rates such as GBP LIBOR and other inter-bank offered rates (IBORs) has become a priority for global regulators in recent years. The Company does not use these rates in the preparation of its financial statements or calculation of prices or benchmarks and accordingly is unaffected by these reforms.

Key performance indicators (KPIs)

Member satisfaction and the delivery of cost effective services and critical system availability are important measures of performance for the Company. There were no critical system outages in the year. Management employs commercial KPIs including transaction volume, new brands and warehouse listings, breadth of member participation in newly launched contracts and the size of open interest in the contracts traded and critical system availability.

In respect of capital, the key performance indicator is compliance with regulatory capital requirements set in accordance with the rules of the Financial Conduct Authority (FCA). The Company held sufficient capital to meet its requirements throughout the year.

Financial KPIs	2021	2020	Increase /
	\$ 000's	\$ 000's	(decrease)
Revenue and other income	205,439	203,251	1%
Operating expenses	110,769	107,623	3%
Earnings before interest, tax, depreciation and amortisation	118,608	117,844	1%
Profit before tax	94,156	93,943	-%
Profit after tax	76,451	77,298	(1)%
Net assets	231,514	189,621	22%

Related non-financial KPIs

Average daily volumes (ADV) (000's; chargeable, excluding administrative trades)	547	571	(4)%
---	-----	-----	------

The fall in ADV was primarily driven by a downturn in global commodity markets as a result of the COVID-19 pandemic. Lower ADVs were offset by a higher fee trading per contract as a result of a greater weighting towards higher-fee trading in 2021 and by increased market data fees and other revenue.

Profits have been broadly stable as the Company continued to invest in systems and people to support the business and interest rate movements had a negative impact on finance income. Operating expenses increased largely due to the appreciation of the British pound.

No final dividend is proposed in respect of 2021 (2020: \$nil). The Company paid an interim dividend of \$35,000,000 during the year (2020: \$47,000,000).

The London Metal Exchange

Strategic report (continued)

Strategy

The Company's strategy is to focus on sustaining its premier status in price discovery for base metals futures and options, and leveraging from this strength to new areas of opportunity. The Company has launched six new contracts in 2021 and continues to seek out opportunities for potential new contracts and markets.

The Company has invested in its global physical ecosystem in 2021, launching both LMEpassport and its new electronic warranting platform and has made progress on its commitments on responsible sourcing and sustainability.

The Company continues to work on its major technology programme which will deliver a new trading platform to the market in 2023. The Company also continues to work with HKEX to build a leading global multi asset class exchange and capitalise on new opportunities arising from the further development of China's financial markets.

Business environment

The Company operates in a competitive and ever evolving market environment and has maintained its position as the world centre for industrial metals trading. The prices discovered on the Company's trading platforms have retained their usage as global reference prices.

Principal risks and uncertainties

The Company's activities as an exchange operating in the United Kingdom exposes it to a number of risks, including credit risk, liquidity risk and foreign exchange risk. The Company manages these risks through various control mechanisms which are discussed in note 22.

COVID-19

The COVID-19 pandemic has continued to pose challenges to the Company during 2021, which saw continued home working for much of the year and a period of hybrid working from September to December 2021.

Staff welfare and morale has been central to the Company's business continuity response to COVID-19. The Company has built on the experience of 2020 and continued to focus on ensuring staff feel supported and have the appropriate equipment to work effectively from home. The Company has implemented measures to maintain staff morale and inclusiveness over the period including the launch of LMEself, an employee-led network focused on mental health and disability and the provision of enhanced wellness weeks where sessions on mindfulness training, physical wellbeing, healthy eating, neurodiversity awareness and menopause awareness training were held.

In September 2021, following the removal of Government workplace regulations and guidelines surrounding social distancing, the Company successfully migrated certain elements of its pricing activities back to its open-outcry Ring facility from the fully electronic method used since March 2020.

Maintaining the operational resilience of the key trading and clearing systems has been a priority for the Company, with a focus on ensuring the robustness of the existing infrastructure, strengthening its cyber-defences, and enhancing the Company's remote working capability.

Competition

The global exchange landscape continues to evolve and become more competitive with a risk that other exchanges and new market entrants will seek to attract liquidity away from the LME. The Company's Strategic Pathway initiatives have been designed to focus on improving the Company's competitive strength and mitigate this risk. The Company will continue to engage with the views and needs of market users and provide its products and services in a cost effective manner. It will also seek to enhance its technology in supporting the market.

The London Metal Exchange

Strategic report (continued)

Principal risks and uncertainties (continued)

Downturn in market activity

A key risk facing the Company is the continued uncertainty in global commodity markets which may impact the Company's trading volumes and revenues. In order to mitigate this risk the LME remains close to its members and users of the market and is actively seeking to modernise its market through the development of a new trading platform and associated infrastructure as well as to develop alternative revenue streams through diversification of its product offerings.

Operational and system resilience

With the ever-increasing reliance placed on technology, the Company is aware of the need to maintain high degrees of operational and system resilience. In addition cyber risk is on the rise with financial services companies among the most heavily targeted. In order to mitigate the risks the Company continues to focus on its people, processes and technology. The Company assesses the risks in its processes on an ongoing basis and seeks to continually improve processes and technology to mitigate those risks. The Company has an operational incident process to manage incidents and to ensure required improvements are identified which may then result in changes to processes or technology.

The Company continues to make significant technology investments including cyber security detection and response, infrastructure improvements as well as application upgrades to the LMEselect trading platform and its matching platform. To assist it in maintaining high levels of operational and systems resilience, the Company maintains a dual data centre approach. The Company delayed the market opening on 11 January 2022 as a result of a power failure at its primary data centre on the previous day. The Company is working with its data centre provider to review the incident and put in place improvements to prevent such a delay recurring in future.

The Company's operational resilience program commenced in 2019. The governance structure and the important business services have been agreed and approved at senior management level and work has continued on developing the framework during the year. In 2021 the FCA set out rules to firms including Recognised Investment Exchanges for building their operational resilience frameworks, following prior consultation papers on the subject. The FCA has set 31 March 2022 as the date by which the framework should be in place and the Company anticipates meeting that deadline.

Regulation and compliance

The Company places a high emphasis on regulatory compliance in all jurisdictions in which it operates, and seeks to promote active and co-operative relationships with its lead regulator, the FCA, and maintains an active interest and involvement where appropriate in regulatory matters arising in the UK and other global locations. Following the UK's withdrawal from the EU the Company will continue to build and maintain good relationships with regulatory authorities in other jurisdictions in which the Company offers services. The implementation of a demanding and still evolving regulatory agenda and other market developments means that regulatory and compliance risks are key risks.

Section 172 Companies Act 2006

All Directors are collectively responsible for the success of the Company and take their duties and responsibilities, including those set out in Section 172(1) of the Companies Act 2006, seriously. When making decisions, the Board of Directors seeks to take the course of action that it considers will lead to the success of the Company over the long term, and this includes considering a broad range of stakeholders.

The Board therefore recognises the importance of effective stakeholder engagement in driving the Company's strategic focus of sustaining its premier status in price discovery for base metals futures and options. Effective stakeholder engagement enables the Board to identify key emerging themes and trends in the markets that are served by the Company.

The Company's key stakeholders include HKEX, Company employees, LME members and their clients, regulators and suppliers.

The London Metal Exchange

Strategic report (continued)

Section 172 Companies Act 2006 (continued)

The Company uses a variety of approaches to engage with its stakeholders throughout the year, including scheduled meetings, member townhalls and LME notices. Thematic results from these interactions with stakeholders are periodically presented to the Directors, primarily by senior management who lead such engagements.

Senior management, and ultimately, the Board of Directors, closely monitor stakeholder-focused metrics, such as member satisfaction, the delivery of cost effective services and critical system availability. As noted earlier in the Strategic report, these remain important measures of performance for the Company.

Stakeholder engagement and business relationships

Members and clients

Ongoing member and client engagement is integral to the Company's governance framework. The Company operates a number of advisory committees (the Advisory Committees) which are a part of the way the Company operates. For example, the LME User Committee represents the interests and views of the Company's members and clients. During 2021 feedback from these committees provided valued input and advice to the Board and senior management.

Suppliers

The Board takes the Company's relationships with its suppliers seriously. This continued to be a key area of focus during 2021, with Board and senior management focus on a number of key initiatives.

The Board also reaffirmed the Company's commitment to ensuring that there is no modern slavery in its organisation or supply chains. A Board-approved Modern Slavery Policy is in place, and this reflects the Company's commitment to acting ethically and with integrity.

Beyond the responsibilities set out in the Modern Slavery Act 2015, the Company has also introduced requirements for responsible sourcing of metal by LME-listed brands. These requirements will ensure that LME market participants taking delivery of metal through the Company can be sure that this metal has been sourced responsibly, in line with international principles as set out by the Organisation for Economic Co-operation and Development. Reporting against these requirements will start in 2022.

Regulators

The Company maintains a regular dialogue with the FCA and its other regulators, engaging on relevant matters such as Board and management changes, capital requirements and proposed new products or services.

HKEX

The Company maintains close links with its ultimate parent company. A number of the Company's Directors also hold directorships of HKEX, certain key management personnel represent the Company at the HKEX Management Committee and there are regular meetings between HKEX management and staff and the Company's employees at all levels across the business.

The London Metal Exchange

Strategic report (continued)

Employee engagement

The Board recognises that engagement with Company employees is fundamental to the Company meeting its objective to provide facilities, along with the management and regulatory structure, for trading in LME contracts. Engagement with employees is undertaken primarily by senior management, through townhalls, a variety of employee forums and regular surveys.

Managing the wellbeing and morale of employees during the COVID-19 pandemic has been a key priority for senior management and the Board during 2021. Company employees were invited to participate in regular employee wellbeing surveys, in order to monitor, report and address any wellbeing concerns and take forward any findings to further improve morale and support productivity. Results of these surveys were communicated to employees, together with initiatives introduced to address the findings. The Board also reviewed the results and made decisions to benefit employee wellbeing as a result of these surveys. The Company also conducted its bi-annual People Survey during the second half of the year. The results have been shared with employees and the Board and findings will feed into continued engagement initiatives in 2022.

With support from the Board and senior management, the Company has continued to build on its diversity and inclusion strategy during 2021. The Company remains committed to the target set under the Women in Finance Charter, whereby it aims to have 40% of senior management roles filled by women by 2025. Various employee networks and forums continue to raise awareness of, and engagement with, diversity among Company employees.

The Board believes that transparency around gender pay gap reporting continues to play an important role in understanding and addressing the gender-based inequality that persists in our wider society in which the Company operates. The gender pay gap published in 2021 showed that progress continues to be made whilst acknowledging that there is still more to do.

Throughout 2022, the Board will continue to review and challenge how the Company can improve engagement with its employees and other stakeholders.

Equal opportunities

The Company is an active equal opportunities employer, which promotes an environment free from discrimination, and where everyone receives equitable treatment and career development regardless of age, disability, sex, gender, gender reassignment, pregnancy, race (which includes colour, nationality and ethnic or national origins), sexual orientation, religion or belief or because someone is married or in a civil partnership among other diverse attributes. All decisions relating to employment practices are objective, free from bias and based on merit. The Company continues to build on its diversity and inclusion strategy and, as part of this, is committed to further enhancing its equal opportunities monitoring.

The Company gives full and fair consideration to applications for employment made by disabled people, and encourages and assists the recruitment, training, career development and promotion of disabled people. The Company also endeavours to retain employees who become disabled during the course of their employment. This includes a commitment to making reasonable adjustments to the employee's working environment where a physical feature or a provision, criterion or practice puts a disabled person at a substantial comparative disadvantage.

The arrangements outlined above are set out in a Company policy, which is subject to periodic review.

The London Metal Exchange

Strategic report (continued)

Charitable activities

The Company is committed to its charitable initiatives and engages with a variety of charitable causes at both a corporate and individual employee level. The Company's approach, priorities and objectives with regard to charitable activities are primarily led by the Charity Committee, which operates under delegation from the Board.

In 2021 the Company partnered with two responsible sourcing charities – Pact and The Impact Facility – with the aim of tackling child labour and children's rights issues in mining communities directly affected by these concerns. The Company donated \$714,000 in 2021 and intends to donate a total of \$1,700,000 to these charities. These donations are made from enforcement funds that have been charged to LME members as fines or penalties.

Pact is undertaking a project in the central and copper-belt provinces of Zambia, working with communities to deliver improved access to education, social services and vocational training, with the aim of reducing the number of children working in mines. The Impact Facility is carrying out a three-year project undertaken as part of the multi-stakeholder Fair Cobalt Alliance, and is designed to significantly reduce the numbers of child miners, through providing support to existing schools in the Democratic Republic of the Congo, encouraging attendance and raising the quality of care for students.

During the year, the Company also made charitable donations amounting to \$114,000 (2020: \$82,000). From 2019 to 2021, the Company was partnered with The Connection, a homelessness charity located in the centre of London, which works with approximately 4,000 homeless people every year to support them in moving away from, and staying off the streets of London. As well as assisting with fundraising for the charity, through sponsored sporting feats and challenges, the Company's staff were able to participate in a limited amount of volunteer work up until the start of the pandemic. Over the course of 2021 the Company's donations helped fund The Bridge, a new accommodation centre born out of the COVID-19 lockdowns, which has kept London's homeless community safe during the pandemic.

In 2021 the Company selected a new charity partner, Inspire!, an education business partnership, based in Hackney. Inspire! works with organisations and individuals across London to make a positive impact on local schools and young people's lives.

The Strategic report was approved by the Board of Directors on 18 February 2022.

Signed by order of the Board of Directors by:

The London Metal Exchange

Directors' report

The Directors submit their annual report to the sole shareholder together with the audited financial statements for the year ended 31 December 2021.

Incorporation

The Company is a private unlimited company. It was originally registered in England and Wales as a private company limited by guarantee. On 13 December 2012 it was re-registered as an unlimited company.

Results

The profit before tax for the year ended 31 December 2021 was \$94,156,000 (2020: \$93,943,000) and after accounting for taxation the profit for the year was \$76,451,000 (2020: \$77,298,000).

No final dividend is proposed in respect of 2021 (2020: \$nil). The Company paid an interim dividend of \$35,000,000 in the year (2020: \$47,000,000).

Directors

The Directors of the Company who were in office during the year and up to the date of signing the financial statements are listed on page 1.

Directors' indemnity and insurance

The Company's Articles of Association provide an indemnity (the Indemnity) for each Director of the Company. The Indemnity, which constitutes a qualifying third party indemnity provision as defined by section 234 of the Companies Act 2006, was in force during the 2021 financial year and remains in force at the date of signing the financial statements. Directors' and officers' insurance cover is also maintained for Directors of the Company.

Future developments

In 2022, the Company will continue to develop its LMEpassport platform. The first reporting period for responsible sourcing is June 2022, for which metal brands will be required to report on their compliance. The Company will continue its work with Metalshub and will publish its climate commitments including its roadmap to carbon net zero.

The Company will continue to work on its major technology programme which will deliver a new trading platform to the market in 2023. The Company will also continue to work with HKEX to build a leading global multi asset class exchange and capitalise on new opportunities arising from the further development of China's financial markets.

The Company announced in January 2022 that its Chief Executive Officer (CEO), Matthew Chamberlain, will be stepping down on 30 April 2022 to pursue career interests outside the HKEX Group. Adrian Farnham (LME Clear CEO) will be appointed Interim LME CEO with effect from 1 May 2022. The Company has begun the process to search for and appoint a new CEO.

Financial risk management

Information in respect of the Company's objectives, approach and exposure in respect of foreign exchange risk, price risk, cash flow and fair value interest rate risk, credit risk and liquidity risk management is provided in note 22 to the financial statements.

The London Metal Exchange

Directors' report (continued)

Capital risk management

The Company's objectives when managing capital are:

- To safeguard the Company's ability to continue as a going concern in order to provide returns for the sole shareholder and benefits for other stakeholders;
- To maintain an optimal capital structure to reduce the cost of capital; and
- To meet its regulatory capital obligations.

The LME is a Recognised Investment Exchange under the terms of The Financial Services and Markets Act 2000. The FCA's capital rules require that the Company must maintain liquid financial resources and net capital in excess of its financial resources requirement (FRR). The FRR comprises the cost of orderly closure plus a risk based capital charge. Liquid financial resources are represented by the Company's cash and cash equivalents, and net capital comprises total equity less share capital, intangible assets and intercompany receivables.

These requirements are closely monitored and the status is reported on a monthly basis to the Board and the FCA. In 2021 the FRR was reset to £60,177,000 (2020: £53,900,000) which, as at 31 December 2021, equates to \$81,507,000 (2020: \$73,679,000). The Company's liquid financial resources and net capital measures exceeded the FRR throughout the year.

Climate risk management

The Company considers climate risk to be an emerging risk that may have an impact on its operations, market, members and clients in the medium term. The Company has assessed that climate risk does not have any impact on the preparation of its financial statements for 2021. The Company will publish its climate commitments including its roadmap to carbon net zero in 2022.

Employee engagement

Disclosures regarding action taken by the Company to engage with its employees have been included in the Employee engagement section of the Strategic report.

Disabled persons disclosures

A statement describing the company's policy on the hiring, continuing employment and career development of disabled persons has been included in the equal opportunities section of the Strategic report.

Charitable activities

Disclosures regarding the Company's charitable activities have been included in the Charitable activities section of the Strategic report.

Streamlined energy and carbon reporting

Carbon dioxide emissions

The Company has calculated its carbon footprint using 2019 as its base year (due to the abnormalities caused by COVID-19 of 2020 and 2021). This was prepared in line with the Greenhouse Gas (GHG) Protocol Corporate Standard. The operational areas that were studied included:

- The Company's offices and apportioned facilities at 10 Finsbury Square and the office in Singapore;
- Business travel by employees;
- Employee commuting and working from home; and
- Data centres and capital goods.

The three largest contributors to the Company's GHG emissions (by operational areas) in the 2019 base year were business travel (47%), data centres (17%) and employee commuting (14%).

The London Metal Exchange

Directors' report (continued)

Streamlined energy and carbon reporting (continued)

Carbon dioxide emissions (continued)

GHG emissions as per the Greenhouse Gas Protocol Corporate Standard

GHG emissions by scope in metric tonnes (carbon dioxide equivalent)	2019
Scope 1 (direct combustion of fuels and company owned vehicles)	-
Scope 2 (emissions from electricity purchased for own use)	267
Scope 3 (indirect emissions from business travel)	2,203
	2,470

In 2021 the Company collected data on energy use and business travel. The Company uses the UK Government GHG conversion factors for reporting.

UK greenhouse gas emissions and energy use	2021	2020
Energy consumption used to calculate emissions (kWh)	1,999,673	787,031
Emissions in metric tonnes (carbon dioxide equivalent)		
Scope 1 (direct combustion of fuels and company owned vehicles)	-	-
Scope 2 (emissions from electricity purchased for own use)	27.7	183.5
Scope 3 (indirect emissions from business travel)	251.5	114.4
	279.2	297.9

During the year the Company emitted 0.008 metric tonnes carbon dioxide equivalent per metre squared of office space (2020: 0.06 metric tonnes per meter squared).

Scope 2 emissions reduced in 2021 as a result of the Company's offices at 10 Finsbury Square moving to electricity supply from renewable sources. Scope 3 emissions increased as a result of business travel recommencing following the end of the strictest COVID-19 social distancing measures, although remaining at a much lower level than the 2019 base year.

Work is underway to create a formal roadmap to indicate the Company's emission reduction strategy. The Company intends to announce its carbon net zero goal and route forward in 2022.

Statement of directors' responsibilities in respect of the financial statements

The Directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulation.

Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have prepared the financial statements in accordance with UK-adopted international accounting standards.

Under company law, Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- state whether applicable UK-adopted international accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The London Metal Exchange

Directors' report (continued)

Statement of directors' responsibilities in respect of the financial statements (continued)

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are also responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006.

The Directors are responsible for the maintenance and integrity of the Company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Directors' confirmations

In the case of each Director in office at the date the Directors' report is approved:

- so far as the Director is aware, there is no relevant audit information of which the Company's auditors are unaware; and
- they have taken all the steps that they ought to have taken as a Director in order to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

Independent auditors

The auditors, PricewaterhouseCoopers LLP, have indicated their willingness to continue in office.

Going concern

In determining the going concern basis for preparing the financial statements, the Directors consider the Company's objectives and strategy, its principal risks and uncertainties in achieving its objectives and its review of business performance and financial position, which are all set out in the Strategic report (see pages 2 to 8).

The Directors are satisfied that the Company has adequate resources to continue in operational existence for the foreseeable future. It was noted that the Company remained profitable during the year despite the COVID-19 pandemic and the associated downturn in the global commodities markets. The Company holds capital in excess of regulatory requirements and is forecast to be profitable and cash generating for the foreseeable future. Accordingly the going concern basis for preparing the financial statements is considered appropriate.

The Directors' report was approved by the Board of Directors on 18 February 2022.

Signed by order of the Board:

T.Hine
Company Secretary

The London Metal Exchange

Independent auditors' report to the members of The London Metal Exchange

Report on the audit of the financial statements

Opinion

In our opinion, The London Metal Exchange's financial statements:

- give a true and fair view of the state of the Company's affairs as at 31 December 2021 and of its profit and cash flows for the year then ended;
- have been properly prepared in accordance with UK-adopted international accounting standards; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Directors' report and financial statements (the Annual Report), which comprise: the Statement of financial position as at 31 December 2021, the Statement of profit or loss and other comprehensive income, the Statement of cash flows, the Statement of changes in equity for the year then ended; and the notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

The London Metal Exchange

Independent auditors' report to the members of The London Metal Exchange (continued)

Report on the audit of the financial statements (continued)

Reporting on other information (continued)

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic report and Directors' report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on our work undertaken in the course of the audit, the Companies Act 2006 requires us also to report certain opinions and matters as described below.

Strategic report and Directors' report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic report and Directors' report for the year ended 31 December 2021 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic report and Directors' report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of directors' responsibilities in respect of the financial statements, the Directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The London Metal Exchange

Independent auditors' report to the members of The London Metal Exchange (continued)

Report on the audit of the financial statements (continued)

Responsibilities for the financial statements and the audit (continued)

Auditors' responsibilities for the audit of the financial statements (continued)

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the company and industry, we identified that the principal risks of non-compliance with laws and regulations related to the Financial Conduct Authority's regulations and UK tax legislation, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the financial statements such as the Companies Act 2006. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries and management bias in accounting estimates. Audit procedures performed by the engagement team included:

- Enquiries of management, internal audit and those charged with governance;
- Review of internal audit reports and minutes of meetings of those charged with governance in so far as they related to the financial statements;
- Review of correspondence with, and reports to regulators;
- Identifying and testing journal entries, including those posted to unusual account combinations, adjustments posted after year-end, backdated journals and those posted by unexpected users;
- Challenging assumptions and judgements made by management in their accounting estimates, in particular in relation to the capitalisation of software costs and impairment assessments of intangible assets; and
- Review of the financial statement disclosures and testing to supporting documentation.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2006 exception reporting

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not obtained all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the Company, or returns adequate for our audit have not been received from branches not visited by us; or
- certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

The London Metal Exchange

Notes to the financial statements

1 Significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all of the periods presented, unless otherwise stated.

1.1 Basis of preparation

The Company's financial statements have been prepared on a going concern basis in accordance with UK-adopted international accounting standards.

The financial statements are prepared under the historical cost convention and on the basis of the principal accounting policies set out below.

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. These estimates and assumptions are based on historical experience and other factors that are considered to be relevant. The areas involving a higher degree of judgement or areas where assumptions and estimates are significant to the financial statements are disclosed in note 2.

In 2021, the IFRS Interpretations Committee issued an agenda decision on cloud computing arrangements which considers how a customer accounts for configuration or customisation costs where an intangible asset is not recognised. The Company's accounting policy has historically been to capitalise these costs as intangible assets in the Statement of financial position. Following the agenda decision the Company changed its accounting policy so that configuration or customisation costs will only be recognised as intangible assets if the activities create an intangible asset that the Company controls and the intangible asset meets the recognition criteria set out in note 1.6. Those costs that do not result in intangible assets are expensed as incurred, or, in certain circumstances, over the expected renewable terms of the cloud computing arrangement.

The policy has been applied prospectively from the start of 2021 because it was not practicable to estimate the effects of applying the policy either retrospectively, or prospectively from any earlier date. Accordingly, the adoption of the new policy has no effect on prior years. The effect on the current year is to decrease the carrying amount of intangible assets at the start of the year by \$1,516,000 and increase operating expenditure by \$1,516,000

1.2 New and amended standards adopted by the Company

In 2021, the Company adopted the following new/revised international accounting standards which were effective for accounting periods beginning on or after 1 January 2021. These amendments were adopted with effect from 1 January 2021 and have had no financial impact on the Company and no impact on the disclosures.

- i) Amendments to IFRS7, IFRS4 & IFRS 16 – 'Interest rate benchmark reform – phase 2'

1.3 New standards, amendments and interpretations issued but not effective for the financial years beginning 1 January 2021 and not adopted early

The following standards, amendments and interpretations have been issued but are not yet effective for the financial year beginning 1 January 2021 and therefore have not been applied in preparing these financial statements.

- i) Amendment to IAS 1 – 'Presentation of financial statements'
- ii) Amendment to IAS 8 – 'Accounting policies'
- iii) Amendment to IAS 12 – 'Income taxes'
- iv) Amendment to IFRS 16 – 'Leases'
- v) Annual Improvements to IFRSs 2018-2020 Cycle

They are not expected to have a material impact on the financial statements of the Company.

The London Metal Exchange

Notes to the financial statements (continued)

1 Significant accounting policies (continued)

1.4 Revenue

Revenue excludes value added tax and other sales taxes, and is recognised in the Statement of profit or loss and other comprehensive income on the following basis:

- i) Trading fees are recognised on a trade date basis.
- ii) Market Data fees are recognised when the related services are rendered.
- iii) Other revenue comprises:
 - Subscription and registration fees; recognised on a straight-line basis over time as the performance obligation is satisfied;
 - Intercompany cost recharges in connection with expenditures incurred on behalf of group companies. These recharges are recognised when the related expenditures are incurred; and
 - All other fees are recognised when the related services are rendered.

Deferred revenue (the terminology “contract liability” under IFRS 15 – ‘Revenue from contracts with customers’ is presented as deferred revenue) is recognised when the customers pay considerations before the Company transfers control of the goods or satisfies a performance obligation. This represents the unsatisfied performance obligations at year end resulting from long-term contracts.

1.5 Staff costs and other expenses

The Company awards shares under the HKEX Group Share Award Scheme (Share Award Scheme), under which the Company receives services from employees as consideration for share awards granted under the Share Award Scheme (Awarded Shares). The fair value of the employee services received in exchange for the Awarded Shares is recognised as employee share-based compensation expense.

The total amount to be expensed is determined by reference to the fair value of the Awarded Shares granted, taking into account all non-vesting conditions associated with the grants. The total expense is recognised over the vesting periods, with a corresponding credit to equity.

The corresponding credit is recorded as a capital contribution in the Company’s financial statements and an increase to investment in subsidiaries in HKEX’s financial statements, with a corresponding credit to employee share-based compensation reserve. Any reimbursement by the Company to HKEX is offset against the capital contribution.

The cost of accumulating compensated absences is recognised as an expense and measured based on the additional amount the Company expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period.

Other expenses are charged to the Statement of profit or loss and other comprehensive income as incurred.

The London Metal Exchange

Notes to the financial statements (continued)

1 Significant accounting policies (continued)

1.6 Intangible assets

Intangible assets consist of software-related projects capitalised when the development stage of the project is completed and the asset can be put into use. Development costs that are directly attributable to the design and testing of identifiable and unique systems controlled by the Company are recognised as intangible assets when the following criteria are met:

- i) it is technically feasible to complete the system so that it will be available for use;
- ii) management intends to complete the system and use or sell it;
- iii) there is an ability to use or sell the system;
- iv) it can be demonstrated how the system will generate probable future economic benefits;
- v) adequate technical, financial and other resources to complete the development and to use or sell the system are available; and
- vi) The expenditure attributable to the system during its development can be reliably measured.

Other development expenditures that do not meet these criteria are recognised as expenses as incurred. Costs incurred in configuring or customising software in a cloud computing arrangement can only be recognised as intangible assets if the activities create an intangible asset that the Company controls and the intangible asset meets the recognition criteria. Those costs that do not result in intangible assets are expensed as incurred, or, in certain circumstances, over the expected renewable terms of the cloud computing arrangement. Costs associated with maintaining computer systems are recognised as expenses incurred. System development costs recognised as assets are amortised on a straight line basis over the estimated useful lives, which do not exceed five years.

The Company selects its amortisation rates based on expected economic lives, taking into account the expected rate of technological developments, market requirements, obsolescence and expected use of the assets. The selected rates are regularly reviewed to ensure they remain appropriate to the Company's circumstances. Residual values and economic lives are reviewed at each balance sheet date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Capitalised assets under development which are not yet ready for use are not amortised but are reviewed for impairment at each balance sheet date.

1.7 Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the assets. They are depreciated when they are available for use at rates sufficient to write off their costs net of expected residual values over their estimated useful lives on a straight line basis. The residual values and useful lives are reviewed at the balance sheet date.

Computer hardware - three years

Leasehold improvements - over the remaining lives of the leases but not exceeding ten years

Furniture and equipment - three to five years

The London Metal Exchange

Notes to the financial statements (continued)

1 Significant accounting policies (continued)

1.8 Right-of-use assets

A contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration.

The Company recognises a right-of-use asset and a lease liability (note 1.12) at the lease commencement date. The right-of-use asset is initially measured at cost (which comprises the initial measurement of lease liabilities, initial direct costs, reinstatement costs, any payments made at or before the commencement date less any lease incentives received), and subsequently at cost less any accumulated depreciation and impairment losses. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

The Company has applied judgement to determine the lease term for some lease contracts in which it is a lessee that include renewal options. The assessment of whether the Company is reasonably certain to exercise such options impacts the lease term, which significantly affects the amount of lease liabilities and right-of-use assets recognised.

Payments associated with short-term leases (i.e. leases with a lease term of 12 months or less) and low value leases are recognised on a straight-line basis as an expense in the Statement of profit or loss and other comprehensive income.

1.9 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, bank balances and other short-term highly liquid investments that are readily convertible into known amounts of cash and are subject to an insignificant risk of changes in value (mainly time deposits), with maturities of three months or less.

1.10 Hedge accounting

The Company designates certain financial instruments as cash flow hedges in respect of highly probable forecast transactions, principally payroll costs and technology costs.

At the point of designation of each hedge, the Company documents the relationship between the hedging instrument and hedged item(s) as well as its risk management objectives and strategy for undertaking hedge accounting. The Company also documents its assessment, both at hedge inception and on an ongoing basis, of whether the hedging instrument is highly effective in offsetting changes in the cash flows of hedged items.

The instruments used for hedging purposes are set out in note 14. Movements on the hedging reserve are shown in note 14 and the Statement of changes in equity. All hedged items will be settled within 12 months and therefore hedged instruments are recorded as current assets.

The effective portion of changes in the fair value of financial instruments that are designated as cash flow hedges is recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in the Statement of profit or loss and other comprehensive income within other gains / (losses).

The London Metal Exchange

Notes to the financial statements (continued)

1 Significant accounting policies (continued)

1.10 Hedge accounting (continued)

Amounts accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss and are recognised in the Statement of profit or loss and other comprehensive income within the relevant cost category.

When a hedging instrument no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in the Statement of profit or loss and other comprehensive income. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the Statement of profit or loss and other comprehensive income within other gains / (losses).

1.11 Financial assets

Assets are classified under financial assets measured at amortised cost if they satisfy both of the following conditions:

- i) the assets are held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Trade and other receivables are classified under this category.

Financial assets measured at amortised cost are initially recognised at fair value plus transaction costs and subsequently carried at amortised cost using the effective interest method. The amortised cost is reduced by a loss allowance for expected credit losses. Interest income, foreign exchange gains and losses and impairment are recognised in the Statement of profit or loss and other comprehensive income. Any gains and losses on derecognition are recognised in the Statement of profit or loss and other comprehensive income.

Impairment

The Company assesses on a forward looking basis the expected credit losses associated with its financial assets measured at amortised cost. For receivables due from customers, the Company applies the simplified approach permitted by IFRS 9 – ‘Financial instruments’, which requires expected lifetime losses to be recognised from initial recognition of the receivables. Expected credit losses of receivables are estimated using a provision matrix based on the Company’s historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both the current and forecast general economic conditions at the reporting date.

For other financial assets measured at amortised cost, the Company recognises a provision for impairment losses equal to 12-month expected credit losses unless there has been a significant increase in credit risk of the financial assets since initial recognition, in which case the provision for impairment losses is measured at an amount equal to lifetime expected credit losses.

Expected credit losses are remeasured at each reporting date to reflect changes in the financial assets credit risk since initial recognition. Any change in the expected credit loss amount is recognised as an impairment loss or reversal of impairment loss in the Statement of profit or loss and other comprehensive income, with a corresponding adjustment to the carrying amount.

The London Metal Exchange

Notes to the financial statements (continued)

1 Significant accounting policies (continued)

1.11 Financial assets (continued)

The gross carrying amount of a financial asset is written off (partially or in full) to the extent that there is no realistic prospect of recovery. Subsequent recoveries of an asset that was previously written off are recognised as a reversal of impairment in the Statement of profit or loss and other comprehensive income in the period in which the recovery occurs.

1.12 Lease liabilities

A contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration. The Company recognises a right-of-use asset (note 1.8) and a lease liability at the lease commencement date.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the lessee's incremental borrowing rate is used. Generally, the Company uses its incremental borrowing rate as the discount rate. The lease liability is subsequently increased by the interest cost on the lease liability and decreased by lease payments made. Each lease payment is allocated between the lease liability and interest expense. The interest expense is charged to the Statement of profit or loss and other comprehensive income over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the lease liability for each period.

1.13 Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade and other payables are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are initially recognised at fair value, and subsequently measured at amortised cost.

1.14 Current and deferred tax

The tax charge for the year comprises current and deferred tax. Tax is recognised in the Statement of profit or loss and other comprehensive income.

a) Current tax

The current tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the United Kingdom. Provisions are established where appropriate on the basis of amounts expected to be paid to the tax authorities.

b) Deferred tax

Deferred tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Tax rates enacted or substantively enacted by the end of the reporting period are used to determine the deferred tax assets and liabilities.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences or the current tax losses can be utilised.

The London Metal Exchange

Notes to the financial statements (continued)

1 Significant accounting policies (continued)

1.15 Foreign currencies

The financial statements are presented in USD, which is the Company's presentational currency. The functional currency of the Company is USD.

Monetary assets and liabilities denominated in currencies other than the functional currency are translated into USD at the rates of exchange ruling on the Statement of financial position date. Transactions in foreign currencies are recorded at the prevailing foreign exchange rates at the date of the transaction. Exchange differences are recorded in other gains / (losses) in the Statement of profit or loss and other comprehensive income.

1.16 Provisions

A provision is recognised where there is a present obligation, whether legal or constructive, as a result of a past event for which it is more likely than not that a transfer of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

1.17 Pension costs

The Company operates a defined contribution pension scheme. The expense of the scheme is charged to the Statement of profit or loss and other comprehensive income as incurred.

1.18 Share capital

Ordinary shares are classified as equity.

1.19 Dividends

The dividend distribution to the Company's sole shareholder is recognised as a liability in the Company's financial statements in the period in which the dividend is approved by the Company's shareholder.

The London Metal Exchange

Notes to the financial statements (continued)

2 Critical accounting estimates and judgements

Judgements and estimates are regularly evaluated based on historical experience, current circumstances and expectations of future events.

In connection with the preparation of the financial statements, management has made assumptions and estimates about future events and applied judgements that affect the reported amounts of assets, liabilities, revenue, expenses and the related disclosures. The assumptions, estimates and judgements are based on historical experience and other factors that management believe to be relevant at the time the financial statements are prepared. On a regular basis, management reviews the accounting policies, assumptions, estimates and judgements to ensure that the financial statements are presented fairly and in accordance with UK-adopted international accounting standards.

Intangible assets

As described in notes 1.6 and 8, the Company incurs significant expenditure on the development of software and implementation of systems. The judgements regarding capitalisation and impairment, and the estimation of the useful life of the assets have a material impact on these financial statements.

The Company follows the accounting policy described in note 1.6.

The Company has carefully considered the following judgements:

- i) whether costs meet the capitalisation criteria under IAS 38 'Intangible Assets'; and
- ii) whether the asset is impaired.

The Company estimates the useful life of its software to be five years for trading systems and three years for non-trading systems based on the expected technical obsolescence of the asset. However the actual useful life may be shorter or longer. If the actual useful life is determined to be shorter, the amortisation charged to the Statement of profit or loss and other comprehensive income will be adjusted.

Deferred taxation

As described in notes 1.14(b) and 11, deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available. The Company follows the accounting policy described in note 1.14(b). The Company has made a judgement that the deferred tax asset will be recoverable using the estimated future taxable income based on the Company's approved budget which forecasts continued taxable income.

Expected credit loss

As described in notes 1.11 and 12, expected credit losses of receivables are estimated using a provision matrix based on the Company's historical credit loss experience, adjusted for factors. The Company follows the accounting policy described in note 1.11.

3 Revenue and other income

Timing of revenue recognition	2021 \$ 000's	2020 \$ 000's
At a point in time	163,014	163,372
Over time	42,425	39,879
	205,439	203,251

4 Operating expenses

Operating expenses comprise the following:

	Note	2021 \$ 000's	2020 \$ 000's
Employee costs	5	54,161	51,486
Amortisation	8	17,008	16,866
Depreciation		6,745	6,213
Impairment of intangible assets		924	-
Technology costs		20,940	20,035
Other costs		10,997	12,977
Bad debt charge		(6)	46
		110,769	107,623

During the year the Company obtained the following services from the Company's external auditors at costs as detailed below:

	2021 \$ 000's	2020 \$ 000's
Statutory audit of the Company's financial statements	199	177
Statutory audit of the Company's related entities	30	26
Audit related assurance services:		
- Company's associated pension scheme for the current period	6	6
- Other	23	21
	258	230

Audit of the Company's related entities is the statutory audit fee incurred by the Company on behalf of HKEX Investment (UK) Limited.

The London Metal Exchange

Notes to the financial statements (continued)

5 Employee costs

Employee costs (including directors) comprise the following:

	Note	2021 \$ 000's	2020 \$ 000's
Wages and salaries		39,589	36,477
Social security costs		7,399	7,878
Other pension costs	18	2,865	2,786
Employee share-based compensation benefits of share award scheme	26	4,308	4,345
Total		54,161	51,486

The number of permanent employees (excluding directors) was:

	2021	2020
At 31 December	306	313
Monthly average for the year	305	313

6 Net finance income and other losses

The London Metal Exchange

Notes to the financial statements (continued)

11 Deferred tax asset (continued)

The deferred tax asset has arisen as a consequence of movements in fixed assets, short lease premium, adoption of IFRS 16, cash flow hedge reserve and share options. \$907,000 of the deferred tax asset will be realised in less than 12 months (2020: \$893,000) with the remaining balance realised in more than 12 months.

Factors that may affect future tax charges

The Company will receive tax relief on the same basis as amortisation of intangible assets.

Deferred tax is measured on a non-discounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws in place at the balance sheet date.

Current and deferred tax

The Finance Act 2020 retained the UK corporation tax rate at 19% from 1 April 2020 onward instead of reducing to 17%, the previously enacted rate. The Finance Act 2021 received Royal Assent on 10 June 2021; as a result the UK corporation tax rate applicable to the Company will increase from 19% to 25% effective 1 April 2023.

12 Trade and other receivables

	2021 \$ 000's	2020 \$ 000's
Accrued income – trading fees	11,031	11,153
Accrued income – other	8,794	6,406
Trade receivables	1,079	3,173
Other receivables	146	119
Prepayments	10,515	9,816
	31,565	30,667

The carrying amounts of the Company's trade and other receivables are denominated in US dollars, apart from \$1,433,00 which is denominated in UK pounds sterling (2020: \$155,000) and \$1,000 which is denominated in Singapore dollars (2020: \$68,000).

The London Metal Exchange

Notes to the financial statements (continued)

12 Trade and other receivables (continued)

For trade and other receivables, the Company applied the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

The expected loss rates are based on the payment profiles of sales over a period of 12 months before 31 December 2021 and 31 December 2020 respectively and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. On that basis, the loss allowance as at 31 December 2021 and 31 December 2020 was determined as follows for trade receivables:

	At 31 December 2021				Total
	Current	More than 30 days past due	More than 60 days past due	More than 120 days past due	
Expected loss rate	0.02%	0.40%	1.52%	0.70%	
	\$ 000's	\$ 000's	\$ 000's	\$ 000's	\$ 000's
Gross carrying amount – accrued income and trade receivables	19,945	593	271	67	20,876
Loss allowance	4	2	4	-	10

	At 31 December 2020				Total
	Current	More than 30 days past due	More than 60 days past due	More than 120 days past due	
Expected loss rate	0.03%	2.85%	1.95%	0.09%	
	\$ 000's	\$ 000's	\$ 000's	\$ 000's	\$ 000's
Gross carrying amount – accrued income and trade receivables	18,996	838	471	388	20,693
Loss allowance	6	24	9	-	39

For other receivables the expected credit loss is close to zero as these receivables have no recent history of default. Details of risk management are set out in note 22(b).

13 Cash and cash equivalents

	2021	2020
	\$ 000's	\$ 000's
Cash at bank	26,148	28,096
Short term deposits	110,651	94,725
	136,799	122,821
Average maturity of short term deposits	1 month	1 month
Weighted average interest rate	0.13%	0.17%

The London Metal Exchange

Notes to the financial statements (continued)

13 Cash and cash equivalents (continued)

All cash and cash equivalents have a maturity of 3 months or less. As a Recognised Investment Exchange, the Company must maintain liquid financial resources and net capital in excess of its financial resources requirement (FRR), The FRR comprises the cost of orderly closure plus a risk based capital charge. Liquid financial resources are represented by the Company's cash and cash equivalents.

Included within cash is \$6,285,000 of monies received in respect of enforcement actions (2020: \$7,443,000). These funds will be applied in accordance with the Financial Conduct Authority's REC requirements.

Included within cash at bank is an amount of £23,500,000 (2020: £nil), equivalent to \$31,939,000 (2020: \$nil) designated as hedging instruments. Further details are set out in note 14.

14 Hedging reserve

Throughout the year a proportion of the Company's sterling cash was designated as a cash flow hedge of foreign exchange risks associated with the cash flows of highly probable forecast transactions relating to the Company's staff and technology costs.

As at 31 December 2021 the hedging instruments totalled £23,500,000 (2020: £nil), equivalent to \$31,939,000 (2020: \$nil).

Movements in the hedging reserve during the year are shown below:

	2021 \$ 000's	2020 \$ 000's
At 1 January	-	510
(Loss) / Gain on hedging instruments recognised in other comprehensive income	(817)	985
Reclassified to profit or loss:		
– wages and salaries	396	(1,446)
– technology costs	-	(49)
Reclassified to Statement of financial position		
– Intangible assets	311	-
At 31 December	(110)	-

No ineffectiveness was recognised during 2021 (2020: \$nil).

15 Trade and other payables

	2021 \$ 000's	2020 \$ 000's
Social security and other taxes	13,107	11,721
Other payables	17,374	19,354
Accruals and deferred income	8,689	12,948
	39,170	44,023

With the exception of deferred income, trade and other payables totalling \$8,162,000 have contractual payment terms of less than three months (2020: \$11,518,000).

The London Metal Exchange

Notes to the financial statements (continued)

16 Lease liabilities

	2021 \$ 000's	2020 \$ 000's
At 1 January	26,427	28,234
Finance cost	799	823
Lease payment	(4,157)	(3,444)
Additions	209	107
Effects of foreign currency movements	(166)	707
At 31 December	23,112	26,427
Analysed		
- Current	2,322	2,861
- Non-current	20,790	23,566
At 31 December	23,112	26,427

The following table shows the remaining contractual maturities of the Company's lease liabilities at the end of the current reporting period.

	2021		2020	
	Present value of the minimum lease payments \$ 000's	Total minimum lease payments \$ 000's	Present value of the minimum lease payments \$ 000's	Total minimum lease payments \$ 000's
	Within 1 year	-	-	-
After 1 year but within 2 years	-	-	640	642
After 2 years but within 5 years	1,567	1,246	2,072	2,208
After 5 years	21,545	24,876	23,715	27,401
	23,112	26,122	26,427	30,251
Present value of lease liabilities	23,112		26,427	
Less: total future interest expenses		(3,010)		(3,824)
Present value of lease liabilities		23,112		26,427

The Company leases various properties and information technology facilities through contracts. These leases typically run for an initial period of 5 to 15 years. Some leases include an option to renew the lease for an additional period after the end of the agreement term. Where practicable, the Company seeks to include such extension options exercisable by the Company to provide operational flexibility.

The Company assesses at lease commencement date whether it is reasonably certain to exercise the extension options. If the Company is not reasonably certain to exercise the extension options, the future lease payments during the extension periods are not included in the measurement of lease liabilities. At 31 December 2021, no potential future cash flows relating to the exercising of extension options have been included in the lease liabilities (2020: \$nil).

The London Metal Exchange

Notes to the financial statements (continued)

17 Provisions

	2021 \$ 000's	2020 \$ 000's
At 1 January	1,360	1,093
Addition	-	225
Effects of foreign currency movements	(13)	42
At 31 December	1,347	1,360

The provision is in respect of the estimated reinstatement and dilapidation costs arising from the Company's leasehold premises with agreements expiring on 31 October 2025 and 31 March 2030.

18 Pension costs

The Company has one pension scheme covering its employees. The principal funds are those in the UK.

Pension costs for the scheme are as follows:

	Note	2021 \$ 000's	2020 \$ 000's
Defined contribution scheme	5	2,865	2,786

19 Share capital

Allotted, called-up and fully paid	2021 \$	2020 \$
At 1 January	156	156
Total share capital as at 31 December	156	156

The Company has 100 ordinary shares in issue. The shares are wholly owned by LME Holdings Limited.

21 Dividends paid to shareholder

A dividend of \$35,000,000 (\$350,000 per share) was paid in 2021 (2020: \$47,000,000, equivalent to \$470,000 per share).

The London Metal Exchange

Notes to the financial statements (continued)

22 Financial risk management

The Company's activities expose it to some financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. Financial risk management is carried out by the Finance department under policies approved by the Board of Directors.

(a) Market risk

Market risk is the risk of loss arising from movements in observable market variables such as foreign exchange rates and interest rates. The Company is exposed to market risk primarily through its financial assets and financial liabilities.

The Company's investment policy is to prudently invest all funds managed by the Company in a manner which will satisfy liquidity requirements, safeguard financial assets and manage risks while optimising return on investments.

Investment and fund management is governed by the Company's Investment Policy, which is approved by the Board and reviewed regularly. The Company's investment policy is designed to ensure diversification of investments across a range of highly rated financial institutions and to minimise risk through the use of risk based limits. No investments are made for speculative purposes. In addition specific limits are set for each counterparty in control of the investments.

(i) Foreign exchange risk

Foreign exchange risk is the risk that the value or cash flows of an asset, liability or highly probable forecast transaction denominated in foreign currency (i.e. a currency other than the functional currency of the Company) will fluctuate because of changes in foreign exchange rates.

The Company is exposed to foreign exchange risk arising from payments of various expenditures (predominately in GBP, a significant component of which is staff costs) and bank deposits denominated in foreign currencies. The Company's treasury risk management policy in the normal course of events is to convert non-USD currencies into USD (the functional currency) as soon as deemed reasonably appropriate to do so in order to reduce exposure to exchange rate fluctuation. An exception to this policy is where an amount of foreign currency is held against future GBP expenditure. The Company seeks to minimise the risk of adverse effects to its Statement of profit or loss and other comprehensive income as a result of fluctuations in foreign exchange rates by undertaking hedge accounting in the form of cash flow hedges. The Company designates cash flow hedges in respect of highly probable forecast sterling transactions – typically for payroll and technology for a time horizon of one to six months.

At 31 December 2021 a 10% weakening/strengthening of GBP against USD, with all other variables held constant, would have resulted in a foreign exchange gain/loss of \$8,162,000 (2020: \$3,283,000), all as a result of translation of GBP denominated trade receivables and bank balances amounting to \$81,618,000 (2020: \$32,830,000).

The London Metal Exchange

Notes to the financial statements (continued)

22 Financial risk management (continued)

(a) Market risk (continued)

(ii) Price risk

The Company is not directly exposed to commodity price risk.

(iii) Cash flow and fair value interest rate risk

The Company has significant interest-bearing assets comprises deposits on call and short-term. The Company's income and operating cash flows however are not materially affected by market interest rates.

The Company's interest rate risk arises from its call and short-term deposits. It has no borrowings and, as a consequence, its interest rate risk is restricted to the impact upon the interest income generated from its call and short-term deposits.

(iv) Sensitivity analysis of movements in interest rates

Based on cash deposits held at the year end, the Company calculated the impact on profit or loss of a 150 basis-point shift in interest rates would be a maximum increase or decrease of \$1,557,000 (2020: \$1,317,000).

The Company places its term deposits to manage its liquidity needs and to maximise revenue within the Board-approved investment policy.

The Company's short-term deposits as at the year-end are \$110,651,000 (2020: \$94,725,000).

(b) Credit risk

Credit risk is managed on a company basis. Credit risk arises from cash and cash equivalents, deposits with banks and trade and other receivables. Cash and deposit balances are held only with banks with long term credit rating minimum of Aa2. Trade and other receivables are primarily settled in cash within 3 months of the balance sheet date. Impairment provisions are made against trade and other receivables based on the accounting policies set out in note 1.

(c) Liquidity risk

Prudent liquidity risk management involves maintaining sufficient cash to meet ongoing operational commitments and adhere to the requirements of The Financial Services and Markets Act 2000 to maintain liquid financial assets amounting to at least six months' operating costs and a risk calculated buffer. Management monitors rolling forecasts of the Company's liquidity reserve on the basis of expected cash flows.

Hong Kong Futures Exchange Limited	8	-	12	-
Gangsheng Technology Services (Shenzen) Limited	-	48	-	37
	6,280	48	2,033	47

During the year the Company paid dividends of \$35,000,000 to its parent, LME Holdings Limited (2020: \$47,000,000).

Amounts due from related parties are typically settled on a monthly basis. An assessment of these intercompany positions has been made and it was determined that the probability of default is extremely low and any expected credit losses would therefore be immaterial. Amounts due to related parties have contractual payment terms of less than three months (2020: less than three months).

Notes to the financial statements (continued)

26 Long term incentive plan

Employees of the Company are eligible to receive share awards under the HKEX Share Award Scheme. Following the decision to award an award sum (Awarded Sum) for the purchase of Awarded Shares to eligible employees and/or selected senior executives, the Awarded Shares are either purchased from the market or are awarded by re-granting the forfeited or unallocated shares held by the Company's Share Award Scheme. Before vesting the Awarded Shares are held in a trust set up by the Scheme.

Further shares are derived from dividends payable on the Awarded Shares held in the Scheme from scrip shares received under the scrip dividend scheme (dividend shares), and are allocated to the awardees on a pro rata basis and have the same vesting periods as the related Awarded Shares.

Employee Share Awards vest progressively over the vesting period after the shares are granted, provided that the relevant awardees (i) remain employed by the Company (ii) are made redundant or (iii) are deemed to be "good leavers" or retired on reaching normal retirement age or suffers from permanent disability. Unless otherwise determined by the HKEX Board, the HKEX Remuneration Committee or the Chief Executive, the vesting period of Employee Share Awards granted was 3 years, and the shares would be vested in two equal tranches from the second to the third year after the shares are granted.

For awardees who do not meet the vesting criteria, the unvested shares are forfeited. The forfeited shares are held by the trustee of the Scheme who may award such shares to the awardees, taking into consideration recommendations of the HKEX Board.

For Awarded Shares granted to the employees of the Company, the fair value of the employees' services received, measured by reference to the grant date fair value, is recognised over the projected vesting period, being the period for which the services from the employees are received and is charged to staff costs and related expenses. The corresponding credit is recorded as a capital contribution in the Company's financial statements and an increase to investment in subsidiaries in HKEX's financial statements, with a corresponding credit to employee share-based compensation reserve. Fair values of awarded shares are derived from quoted market prices on the date of purchase. Any reimbursement by the Company to HKEX is offset against the capital contribution.

During 2021, Awarded Sums amounting to \$5,346,000 were granted to selected employees (2020: \$4,479,000). At 31 December 2021, the purchase of shares to fulfil those awards had not yet been completed.

Details of the awarded shares vesting in part or in full in 2021:

Date of Award	Number of shares awarded	Average fair value per share \$	Reference sum award \$ 000's	Vesting period
31-Dec-18	165,273	29.68	-	7 Dec-2018 – 7 Dec-2021
31-Dec-19	157,767	32.59	-	12 Dec-2019 – 12 Dec-2022
31-Dec-20	79,170	56.57	-	9 Dec-2020 – 9 Dec-2023
31-Dec-21	-	-	5,346	7 Dec 2021 - 7 Dec-203

Movement in the number of awarded shares:

	2021	2020
Outstanding at 1 January	207,063	363,425
