Description

The futures banding report is a daily report showing the number of market participants holding futures positions as a percentage (%) of Market Open Interest.

The futures banding report is presented by contract (including LMEX), by long and short position, by prompt date. The prompt date is indicated as M1, M2 and M3 representing the three nearby third Wednesday prompt dates, or second Wednesday prompt dates in the case of LMEX contracts.

The positions are broken down into five 'bandings' in terms of the size of the positions as a percentage of Market Open interest for that particular third Wednesday prompt date : 5-<10%, 10-<20%, 20-<30%, 30-<40%, 40%>. It is reported 2 business days in arrears.

This data is only available to purchase from 2004 to 2018.
