New Trading Platform Update Forum

20 January 2021

Housekeeping

- Questions please submit any questions you have throughout the webinar using the Q&A function. If given the option, please direct your question to "All panellists" rather than any individual speaker. We will do our best to answer all questions, but will respond directly to you with the answer to any we don't have time for.
- Slides slides will be distributed to everyone by email after the session.
- Recording this session is being recorded, and the recording will be shared with attendees after the event should you wish to share with colleagues who were unable to join today.
- Follow-up if you have any questions that you'd like to discuss with one of the team directly, please reach out at newtradingplatform@lme.com.

Forum overview

LME new trading platform initiative

The purpose of the forum is to update Members, ISVs, Market Data Vendors and Clients on the progress of the LME new trading platform initiative.

1. A recap of the key areas

- TT Trading GUI, "LMEtrader"
- Market data
- FIX/Binary gateways
- Market migration

2. Updates on

- Project timelines
- Customer testing
- Go-live
- Next steps and timeline

Please note, the following slides contain a number of dates and timelines that are based on the latest information. Any changes to these dates/timelines will be communicated via the methods described at the end of this presentation.

Application versions

Summary of the current and future application version numbers

Trading venue	Current trading platform	Future trading platform	Current market data platform	Future market data platform
Electronic	LMEselect (v9)	LMEselect (v10)	LMEsource (v3) LMEselectMD	LMEsource (v4)
Ring			LMEselectMD	LMEsource (v4)
Inter-office			LMEselectMD	LMEsource (v4)

Market design

Market design – key features and external impacts

New trading platform initiative involves a number of changes that will impact market participants

New LMEselect (v10) offering enhanced functionality

New FIX 5.0 interface (replaces current FIX 4.4 interface) offering convenience of industry standard interface

New binary interface offering reduced latency

New market design based on market partitions offering predictable latency and scalability

New LMEtrader application offering improved distribution

New LMEsource (v4) providing market data pertaining to the Ring, inter-office and electronic trading venues – replaces the current LMEselectMD and LMEsource (v3)

Market design – market partitions

Market partitions offering performance, predictable latency and scalability

Order management

Each partition gateway (binary protocol) offers direct high performance access to a single ME partition

Order management

Convenience gateways (FIX 5.0) offer single connection access to all markets

Risk management

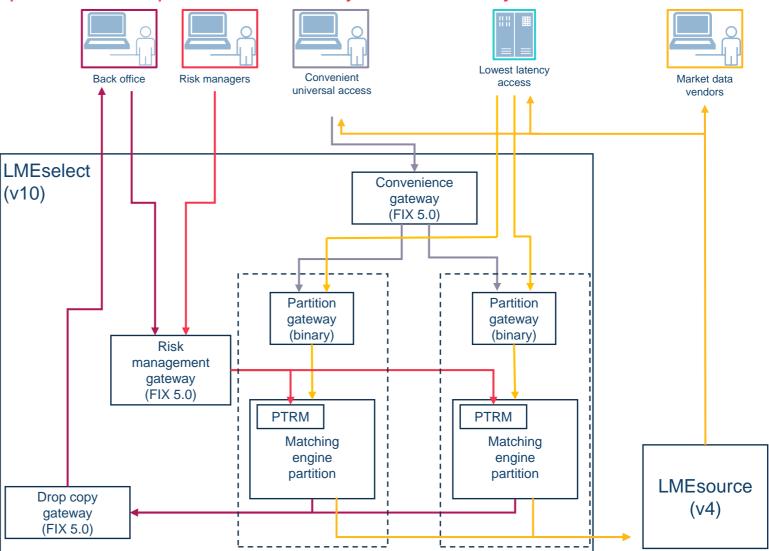

Single risk management gateways (<u>FIX 5.0</u>) offer configuration of PTRM for each partition

Back office

SEP and MMP configuration across all markets
Single drop copy gateways (<u>FIX</u> <u>5.0</u>) deliver FIX execution reports across all markets

Market data

LMEsource (v4) provides data access across all markets

LMEselect (v10) – FIX and binary interfaces

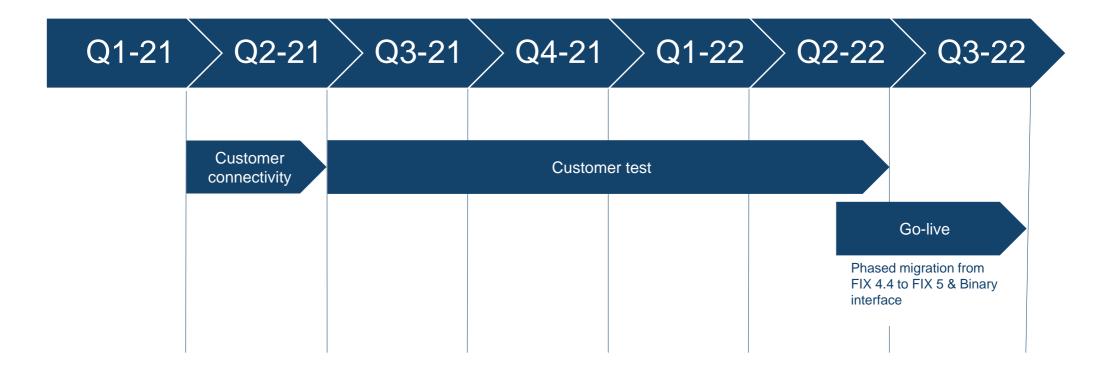

LMEselect (v10) will support both FIX 5.0 and Binary interfaces

	FIX 5.0	Binary	
Objective	Single gateway connection to all market partitions	Fastest route to a single partitionSpecifically designed to reduce latency	
Principles	Aligned with FIX principlesMinimise use of custom tags	 Proprietary protocol, based on the existing HKEX cash binary interface 	
Convenience gateway	Yes (excluding mass quotes)	No	
Partition specific gateway	No	Yes (including mass quotes)	
Drop copy gateway	Yes	No	
Risk management gateway	Yes	No	
Specifications	Available on the New Trading Platform website; https://www.lme.com/Trading/New-initiatives/New-trading-platform/FIX-binary-and-GUI		
Test Service Availability	Q2 2021 (Connectivity) Q3 2021 (Conformance)

FIX 5.0 & Binary interface

LMEtrader

LMEtrader – overview

The LME will partner with Trading Technologies to provide the front-end interface for LMEselect (v10)

Lowering barriers to entry

- Advanced browser-based trading GUI
- Mobile access for Android and iOS (if permissioned by member)

Broadening participation in our market

- · Direct access to clients and members
- · Access to all LME products

Enhancing the user experience

- Rich feature set including options trading functionality and RFQs
- Customisable layout that persists through upgrades

Early adoption

• LMEtrader available Q4 2021 on the current LMEselect (v9) to support user familiarisation and early adoption

LMEtrader – key features

Summary of features provided by the new trading GUI

Access

- ❖ Browser-based access for Chrome. Firefox and Edge
- ❖ Wider distribution with direct access for members and their clients
- Pre-defined, customisable & sharable workspaces
- ✓ Mobile access for Android and iOS

Market Data

Charting and analytics

Order Entry

- ❖Trade the entire LME product suite
- Market depth ladder
- Single click order entry

Order Book Mgt.

- Broken date spreads
- ❖ Intra-day strategy creation
- ✓ Enhanced merged order books

Premium Quoted **Options**

- √ Submit and subscribe to RFQs
- ✓ Trade premium quoted options
- ✓ "On the fly" options strategy creation

Risk Mgt.

- ✓ PTRM configuration
- ✓ Self execution prevention
- √ Kill switch
- ✓ Market maker protection

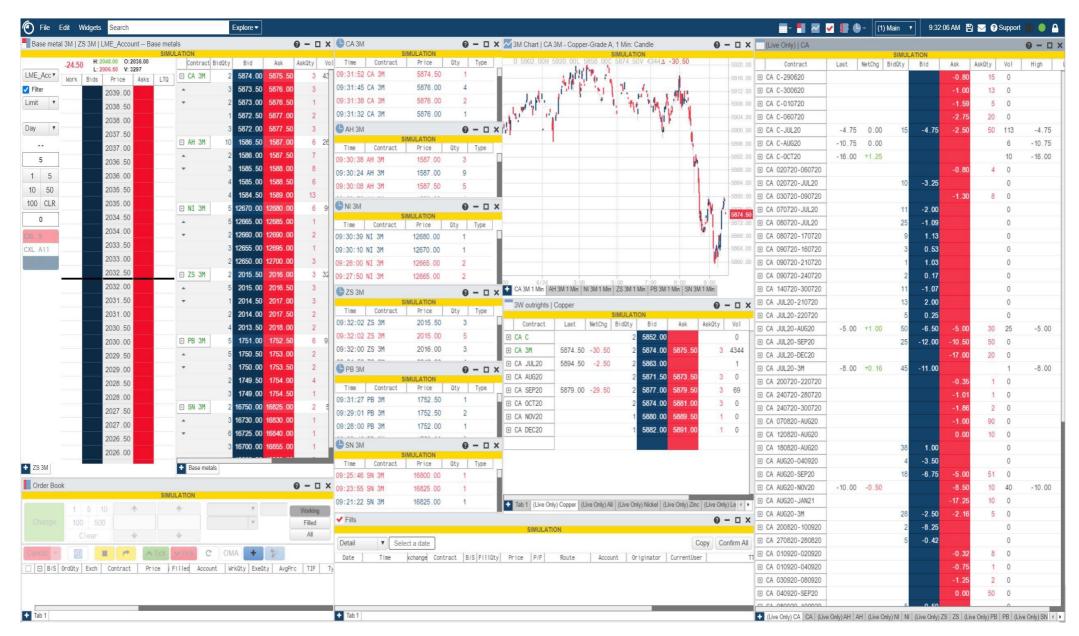

Supported on LMEselect (v9) and LMEselect (v10)

Supported on LMEselect (v10) only

LMEtrader – timeline

Market data

Market data – electronic trading

All new and fully re-built version of LMEsource (v4) to support LMEselect (v10)

Key features:

- All functionality offered by LMEselect (v10)
- Orders and trades available together in the same market data channel
- Separate channels for options and futures
- RFQ details to be included in the order and trade channel
- Reference data, providing a full list of securities/tradeable instruments
- Publication of ISINs in the reference data channel
- Level 3 product: new order-by-order events published from the electronic market

Key dates:

- Client Interface Specification issued Q2 2020
- Connectivity test Q2 2021
- Test service available from Q3 2021

Please note: The current LMEselectMD & LMEsource (v3) platforms will not support LMEselect (v10) and will be decommissioned.

Market data – non-electronic trading

All new and fully re-built version of LMEsource (v4) will provide Ring and inter-office market data

Key features:

- Offer equivalent non-electronic market data for:
 - LME reference prices (eg LME Official Prices, LME Closing Prices, LMEbullion prices)
 - Inter-office and Ring orders and trades
 - Inter-office and Ring reference data
 - Trading volume data
 - Warehouse stock data
 - Risk data (e.g. EOI, MOI and Futures Banding)
 - ISIN data provided

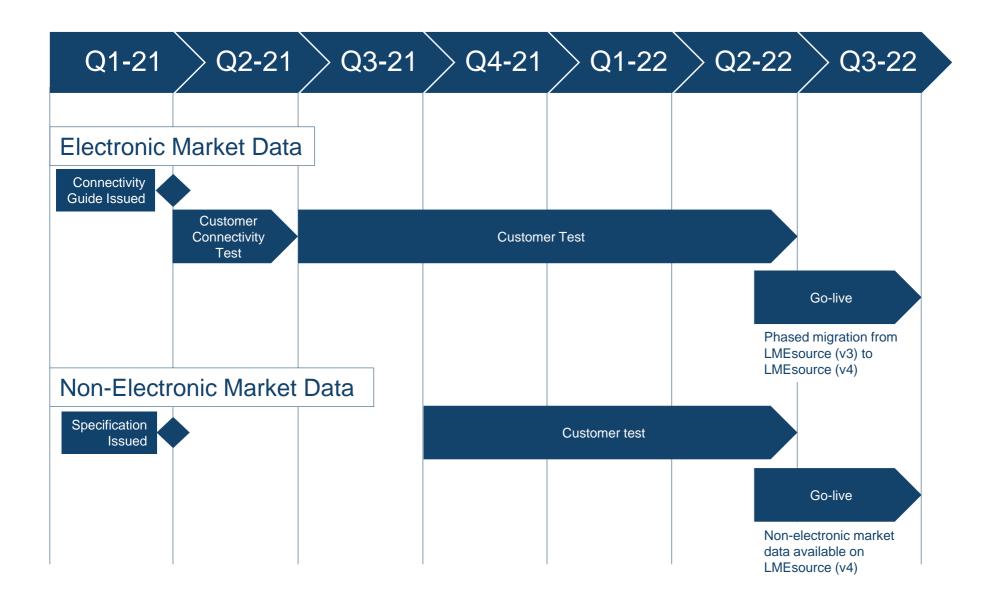

Key dates:

- Client Interface Specification issued Q1 2021
- Test service available from Q4 2021

Please note: The current LMEselectMD <u>will be decommissioned</u> as part of the migration to LMEselect (v10).

Market data – delivery roadmap

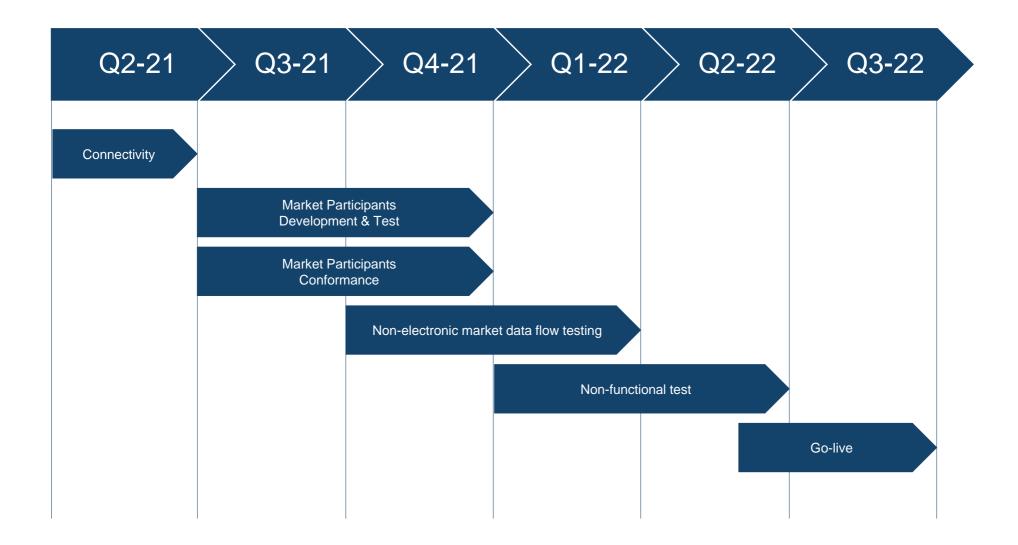

Customer testing

Customer test – high-level plan

Market migration

Migration approach

Migration approach proposal

- To minimise migration risk from LMEselect (v9) to the new LMEselect (v10) the LME is proposing a phased migration
- Migration phases will be product based
- It is assumed migration will consist of two phases, with a short period between each
- Each migration phase will be "big bang" no provision for backwards/forwards compatibility
- LME will assist participants with their migration preparation including:
 - Regular communication updates
 - Early visibility of technical specifications
 - Six-month (minimum) test window including dev/test, conformance, end-to-end
 - All migration phases to be rehearsed in a customer test environments

Next steps and timeline

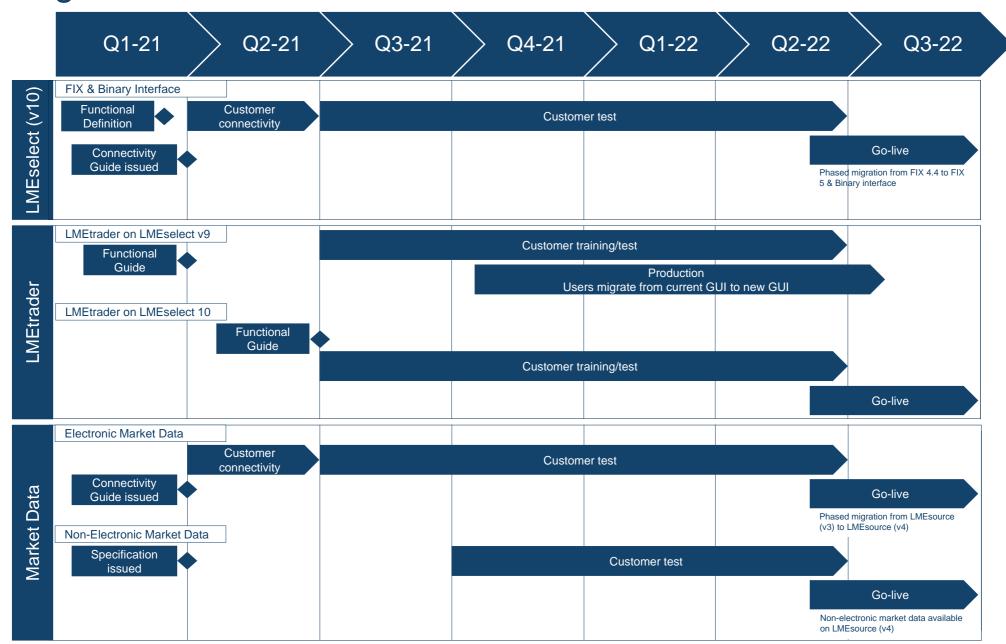

Next steps

New trading platform initiative involves a number of changes that will impact market participants

Participant next steps: Due Date: Line up development and testing resources Now Assign Project Manager/Point Of Contact Provide feedback on the LMEselect (v10) FIX 5.0 & binary interface Now specification • Provide feedback on the LMEsource (v4) client interface specification for Now electronic market data Q1 2021 Provide feedback on the LMEselect (v10) Functional Definition • Provide feedback on the LMEsource (v4) client interface specification for non-Q1 2021 electronic market data
