

LME Matching Rules

Version 2.3

Matching Rules

Defined Terms

1. Capitalised terms not otherwise defined herein shall have the meaning ascribed to them in the Rules and Regulations of the LME (the “**LME Rulebook**”). These matching rules form part of the Administrative Procedures that may be adopted by the Exchange (also referred to as the “**LME**”) from time to time in accordance with the LME Rulebook.

General Information

2. All business transacted on the Exchange is subject to price validation, whether that be on an order-by-order basis for business agreed and Executed on LMEselect, or trade-by-trade for business agreed non-electronically (i.e. on the Ring and inter-office market). For the avoidance of doubt, and as set out in Trading Regulation 2, agreement of a trade results in an Agreed Trade that is "Executed", provided that the Acceptance Criteria are satisfied. The point at which Execution occurs on each of the LME's Execution Venues is set out more fully in Trading Regulation 2.
3. Where an order or trade fails any pre-execution check, including the price validation check, Regulation 3.10.1 of Part 3 of the Rules requires Members to follow the relevant Administrative Procedure in relation to the correction of “**Failed Checks**” (meaning Pre-Execution Checks set out at Regulation 2.8.1 of Part 3 of the Rules that have not been met, and, in respect of Ring trades, the price validation check undertaken on entry of the trade into the Matching System). Where an order or trade fails the price validation check, Members are required to contact the Exchange to explain the rationale as to the price of the rejected order or trade. In relation to the correction of any Failed Checks, the Member may be required to provide such additional information as the Exchange deems necessary and appropriate in determining whether the relevant order or trade should be permitted to be re-submitted in its original form. Members should note that where re-submission has been permitted, there may be a requirement to post additional collateral to the Clearing House, and Members must comply with such requirements.

4. The hours on each Business Day during which the Matching System is open and able to receive information regarding Agreed Trades (being the "Opening Hours" for the purpose of the LME Rulebook) are 01:00 to 20:00 London time in respect of trades for the LME Base Service. Requests for extensions to the TOM matching deadline or the London inter-office trade input deadline will only be granted in exceptional circumstances. Requests must be made to LME Inter-Office Trading no later than 15 minutes prior to the relevant deadline (email: interofficetrading@lme.com; tel. no. +44 (0)20 7113 8201). The relevant deadlines are as follows:

LME Base Service

TOM Trading Deadline: 12:30 London time

TOM Matching Deadline: 13:30 London time

Trade Input Deadline: 20:00 London time

5. The trading hours for the agreement of trades are as follows (all times are London time):

	LME Base Service	
Ring	See the "Trading Time and Dates" section of the www.lme.com	
LME Select	01:00 – 19:00	
Inter-office	24 hours	

6. For the LME to fulfil its regulatory reporting obligations, the Matching System will connect to LMEselect at 01:00. Members should therefore give consideration as to when they connect to the Matching System. In order to receive all trade messaging Members will be required to login to the system in advance of the 01:00 opening. Should members choose to login after the open they will be required to perform a Trade Mass Status Request whereby only the current state of the transaction is captured.
7. Members are responsible for the input of an Agreed Trade and all relevant particulars of an Agreed Trade into the Matching System within the timescales set out in Regulation 3.5 of the Trading Regulations, subject that registration of Agreed Trade halves agreed during Asian business hours (including those arranged by a Registered Intermediating Broker) must be submitted to the Matching System by 08:30. Members are not obligated to submit Agreed Trade halves from 01:00, when the Matching System opens.
8. Members must retain a full audit trail for all orders submitted to LME Select, all Agreed Trades agreed non-electronically, and all post-trade operations. The audit trail should contain sufficient information to demonstrate a complete history of the transaction, if requested by the Exchange. Where Members have Executed transactions in currencies other than US Dollars, the audit trail for these transactions must include the relevant US Dollars price and the FX rate used to calculate the non-US Dollars price. In addition, Members must ensure that they have appropriate documentation in place with their Clients prior to arranging, agreeing or Executing orders received from them (e.g. give-up agreement etc.).
9. Cash-Settled Futures, LMEmini Contracts, Monthly Average Futures, and Premium Contracts may only be executed in US Dollars. All other contracts may be executed in US Dollars, Euro, Japanese Yen or Pounds Sterling.
10. Agreed trades that are agreed as Carries should be entered as such in to the Matching System and the audit trail for the transaction should clearly demonstrate whether a trade is an outright or a Carry. When submitting Carry

trades into the Matching System, Members must follow market convention and enter the near leg first followed by all other legs in chronological prompt date order.

11. Members are advised that where there is a requirement to adjust (Reversal/Correction) a previously registered Member to Member Carry trade when the near leg has expired all subsequent legs should be entered to the Matching System as outright trades. Where a Member to Client Carry trade requires adjustment, only the individual leg that requires adjustment need be reversed and then corrected, where appropriate.
12. Members must not use the LME Base Service for any abusive practice which may include, but is not limited to, the avoidance or evasion of the Rules or any Administrative Procedure.
13. Members are reminded that, when entering trades to the Matching System they must use their own order/trade data and not rely upon that entered by the other party to the trade.

Trade Categories and Post Trade Functions

14. The following trade categories will apply for all business that is agreed non-electronically¹ :
 - **Normal** – is used to enter new market trades Executed on the Ring, Basis Ring (as described in paragraph 16 below), or agreed in the inter-office market or via the Matching System. This trade category should also be used when adjusting trades Executed in LME Select following the application of the Lending Rules.
 - **Give-Up Executor/Give-Up Clearer** – is used to effect the give-up of a transaction to another Clearing Member.
 - **OTC Bring-On** – is used to convert a previously executed over-the- counter contract to a Cleared Contract, where the intention is to bring the transaction on-Exchange. Further information regarding the OTC Bring-On trade category is contained in the section headed “OTC Bring-Ons and OTC Backloading” below.

¹ Business Executed via LME Select will always have a Trade Category of Normal.

- **OTC Take Off** – is used to convert an on-Exchange Contract to an over-the-counter contract.
- **Financing** – is used to enter a trade that relates to financing transactions.
- **Exception Reportable** – this trade category can only be used with the prior approval of the Exchange. Members must contact the LME Inter-Office Trading team (interofficetrading@lme.com, phone no: +44 (0)20 7113 8201) in advance of submitting an Exception transaction to the Matching System, providing details and the rationale for the transaction. This category can only be used in order to submit a trade to the Matching System that has been identified by the Member as a reportable transaction under MiFID II.
- **Exception Non-Reportable** – this trade category can only be used with the prior approval of the Exchange. Members must contact the LME Inter-Office Trading team (interofficetrading@lme.com, phone no: +44 (0)20 7113 8201) in advance of submitting an Exception transaction to the Matching System, providing details and the rationale for the transaction. This category can only be used in order to submit a trade to the Matching System that has been identified by the Member as a non-reportable transaction under MiFID II. An example of this would be the submission of a transaction derived from an option expiry.

Post Trade Functions

- **Transfer** – is used to effect the move of a registered single trade or group of trades (“a position”) between Members or alternatively within a Member’s own client account structure.

Price Types

15. The following price types will apply for all business that is agreed non-electronically²:
- **Current** – must be used to record Agreed Trades arranged at current market prices and transactions executed at current market process that are subsequently averaged for entry to the Matching System on TD+0 or TD+1.
 - **Historic** – must be used to record all other transactions (e.g. OTC Bring-Ons, transfers (as applicable) and historic price carries) from TD+2 onwards.

² Business Executed via LME Select will always have a price type of Current.

Because of the requirement to match trades within 10 minutes of Agreement of an Agreed Trade (see Regulation 3.5 Part 3, of the LME Rules), the “Average Price” price type is no longer available, as trades must not be held back from submission to matching. However, Members may create a single average price transaction for a single Client within their own systems, provided a full audit trail is maintained of any such actions (see paragraph 33 below).

Venue Codes

16. The following venue codes will apply:

- **Select** – for all electronically Executed business.
- **Ring** – for all business Executed in the Ring.
- **Basis Ring** – for any trade agreed between a Category 1 Member and their Client pursuant to an order placed with that Category 1 Member, that is filled in the Ring during the relevant Ring or kerb session, basis a price(s) discovered in the Ring³ through trading or quoting.
- **Inter-office** – for all other business agreed non-electronically, including trades arranged by RIBs, and which is Executed pursuant to confirmation by the Matching System.

Short Price Codes

17. The following price codes will apply:

- **Settlement Price (“S”) Code** – where the price for an outright trade or the near leg of a Carry is based upon that day’s Settlement Price with other Carry leg(s) priced relative to the first leg plus or minus an agreed premium or discount.
- **Closing Price (“C”) Code** – where the price is based upon that day’s Closing Price for the relevant Prompt Date for each outright trade or Carry leg and may include plus or minus an agreed premium or discount. This code should only be used in conjunction with the inter-office venue.

³ This applies to prices in relation to which the primary pricing methodology is Ring-based, notwithstanding that prices in relation to which the primary pricing methodology is electronic may (e.g. in business continuity scenarios) utilise Ring activity as part of the pricing process.

- **Basis the Closing Price (“B”) Code** – where the pricing basis for the near leg of a Carry is the Closing Price for the relevant Prompt Date and the other leg(s) is priced relative to the first leg plus or minus an agreed premium or discount. This code should only be used in conjunction with the inter-office venue.
- **Yesterday’s Settlement Price (“YS”) Code** – where the price is the previous Business Day’s relevant Settlement Price.
- **Valuation Price (“V”) Code** – where the price is the previous Business Day’s relevant Closing Price. This code should only be used in conjunction with the inter-office venue.
- **Mean Cash (“MC”) Code** – where the price is the mean of the bid/offer spread for the relevant Cash prompt based on the Official Price.
- **Mean 3 Month (“M3”) Code** – where the price is the mean of the bid/offer spread for the relevant 3 Month prompt based on the Official Price.

18. In all cases where a short price code has been used, and once the relevant absolute value has been made available, the Matching System will substitute the correct price for each code, and calculate absolute values for all leg(s) containing a price differential. For short price codes YS and V, the substitution of the absolute price will occur automatically upon submission.

Trade Submission Deadlines

19. Regulation 3.5 of Part 3, of the Rules sets out the deadlines for matching Contracts.
20. Where Client Contracts have been agreed after 19:50 London time with respect to LME Base Contracts (i.e. 10 minutes prior to the close of the Matching System), then the registration of these transactions must be completed by 08:30 London time on the following Business Day including those transactions arranged by RIBs.
21. Regulation 3.5.1(d) of Part 3 of the Rules states that business Executed in the Ring must be submitted within 10 minutes of the close of the Ring trading period in which the Agreed Trade was Executed. Where Agreed Trades have been agreed, either in the Ring or in the inter-office market, using either the Official, Mean or Closing Price as the basis for the trade price, then the relevant Ring

time code should be entered, but the matching deadline will be 10 minutes after all relevant data has been made available by the Exchange (i.e. after any objection period, and once the Official Prices/Closing Prices have been declared final).

22. As set out in Rule 3.5.1 of Part 3 of the Rulebook, RIBs are responsible for registered Agreed Trades in the Matching System within 10 minutes of arranging the trade in the inter-office market. Where a RIB has registered an Agreed Trade in the Matching System, the Clearing Member must approve or reject the Agreed Trade within the Matching System within 10 minutes of such registration.

Trade Times

23. Depending on the venue, the Trade Time field must be completed as follows:

- **Select** – this field is automatically populated upon the matching of relevant orders, no further action is required by Members.
- **Ring** – either “R 1-3” if Executed during a Ring session or “K 1-2” if Executed during a kerb session.
- **Basis Ring** – either “C 1-3” if agreed during a permissible Ring session or “D 1-2” if agreed during the relevant kerb session (see also paragraph 16 above).
- **Inter-office** – the time at which the trade was agreed⁴, and must be entered as HH:MM:SS.

Accounts

24. The Matching System supports the following accounts:

- **H** – House, for all proprietary, non-Client business;

⁴ Note that this will record the time of: (i) the Contingent Agreement to Trade; or (ii) the agreement of the Agreed Trade arranged by the RIB; pursuant to Regulation 2.5.1(d) or 2.5.2(e), as applicable, of Part 3 of the LME Rules, the Agreed Trade shall, provided that it satisfies the Acceptance Criteria, be Executed at the time, that the Matching System confirms that the Agreed Trade is matched and that all Pre-Execution Checks are satisfied.

- **U** – Unallocated, sub-account of H, for all business that is to be given-up to another Clearing Member even where the details of the Clearing Member are known;
- **C** – Client, for all business allocated to a net omnibus segregated Client account (OSA);
- **G** – Client, for all business allocated to a gross omnibus segregated Client account (GOSA);
- **S** – Client, for all business allocated to an individual segregated Client account (ISA); and

25. The Client Code field (“Cust”) is a mandatory entry field for Client Contracts. This field must be populated with the code used to identify the beneficial owner of the Client Contract in the Member’s books and records. This code must be consistent with that used when reporting positions to the Exchange.
26. When entering orders on LMEselect, Members must ensure that they identify the correct account where appropriate. Trades incorrectly identified will be allocated to an X Account of the Clearing Member and it will be the responsibility of the Clearing Member to reverse the trade and allocate it to the right account in accordance with the procedures set out in paragraphs 36-42 below.

Post-Trade/Administrative Functions

27. This section details the post-trade/administrative functions that are available for Members; Members are encouraged to contact the Exchange if they are unsure how to effect any particular post-trade activity (email: interofficetrading@lme.com, phone +44 (0)20 7113 8201).

Transfer

28. This post-trade category should be used to move a single trade or a group of trades (“a position”) between Members, for a common Client or non-common Client between two Clearing Members or alternatively within a Member’s own account structure.
29. This post-trade category should also be used where Members wish to undertake a metal position exchange (formerly referred to as a metal position swap)

whereby users of physical metal swap (exchange) an existing on-Exchange hedge and a commitment to deliver physical metal. The entry recorded in the Matching System is therefore the movement of a position for a non-common Client.

30. When undertaking a physical metal swap for a non-common Client, Members are required to have an appropriate and effective written agreement in place prior to entering such a transaction. Members must maintain a full audit trail to demonstrate the complete history of a transaction. Each Member must apply appropriate due diligence measures to satisfy themselves that the Metal Position Exchange is for a legitimate purpose, confirm via the agreement that the Client is a direct customer, and has given the Member prior written instructions regarding the metal swap transaction. The Member must ensure that the transaction is not in breach of LME Rules or other appropriate legal requirements.
31. Members executing an exchange for physical (“**EFP**”) transaction and in doing so wish to create a new hedge on Exchange (as opposed to using an existing position), should use the Financing trade category. Where the Members or their Clients wish to use an existing position as a hedge for an EFP transaction, then this constitutes a metal position exchange and the Transfer trade category should be used.
32. Where transferring a Client position between Clearing Members for the Base Service, the position must first be moved out of the relevant GOSA/OSA/ISA account to the Member’s House account using the Transfer post-trade category. Once this registration has been completed, the Transfer trade half may be entered into the Matching System for matching with the other Clearing Member to effect the Transfer. Once the Client position has been received into the Member’s House account, the position should subsequently be moved to the relevant GOSA/OSA/ISA account.
33. Client positions may be transferred at the original “Historic” contract price, or “Current” market price (usually the Closing Price for the relevant Prompt Date). Members may transfer a single trade or a trade weighted average of the longs AND a trade weighted average of the shorts as long as they maintain a sufficient audit trail to demonstrate how the “average” price was calculated and which pricing basis was used. **Members may not offset long and short positions between two or more accounts to effect a position transfers, for the purpose of avoiding or evading the Matching Rules or otherwise.** Members may not average/amalgamate trades using different pricing bases.

34. The Transfer post-trade category should also be used to offset a **common** Client's delivery exposure for the Cash Today ("**TOM**") or Cash Prompt Date for existing on-Exchange positions. In these circumstances, a net position may be offset at each Clearing Member by submitted the relevant entries to the Matching System priced at the Official Settlement Price for the Prompt Date.
35. The Transfer post-trade category may also be used to offset an existing on-Exchange position at one Member with an OTC position at another Member for a **common Client**, or an existing OTC position at one Member with an on-Exchange position at another Member for a common Client using the Transfer trade category in conjunction with the OTC Bring-On trade category as applicable.

Reversal/Correction Cancellation Flag

36. To execute a Reversal/Correction the cancellation trade flag should be used to correct errors that may have occurred in one or more of the fields entered into the Matching System at the point of trade submission. In addition, this facility should also be used in conjunction with the revised Give-Up process detailed below.
37. Trades previously submitted with a Reversal/Correction trade category must be submitted with the same trade category as the previously registered trade. The new trade must have the correct Cancellation Flag and the Cancel Link Id set to the Matching Reference Number of the original trade.
38. Trades submitted to the Matching System with the Reversal trade flag must reflect the exact economic trade details of the trade originally registered other than the 'Buy/Sell' indicator. For the avoidance of doubt, no partial Reversals are permitted.
39. Client Contracts may be cancelled and resubmitted to the Matching System on the day of trade ("T") but errors identified thereafter (T+1 onwards) must be corrected using the Reversal/Correction above.
40. In the event that a trade Executed in LME Select requires a price adjustment as a result of the Lending Rules, Members must use the Reversal/Correction process Normal trade category against venue inter-office to effect the necessary adjustment.
41. The Reversal/Correction process can also be used to effect a currency

conversion in which an existing Client Contract is converted from one currency accepted by the Exchange to another currency accepted by the Exchange.

42. In the event that an Agreed Trade is arranged by a RIB and is matched and submitted to the Matching System, and needs to go through the Reversal/Correction process:

- the RIB must liaise with each Clearing Member to agree the correct details of the Agreed Trade to be re-submitted;
- once agreed, either of the following processes should be followed in order to execute a Reversal/Correction:
 - the RIB shall enter two new trades with the Cancellation flag set to Reversal/Correction, to: (i) counter the original registration of the Agreed Trade in the Matching System (Cancellation flag set to R (Reversal)); and (ii) register in the Matching System the Agreed Trade with the correct details agreed by each Client of the RIB (Cancellation flag set to C (Correction)). Both the Reversal and the Correction will have to be approved by both Clearing Members in order to match and lead to an Agreed Trade; or
 - alternatively, each Clearing Member shall enter two new trades with the Cancellation flag set to Reversal/Correction, to: (i) counter the original registration of the Agreed Trade in the Matching System; and (ii) register in the Matching System the Agreed Trade with the correct details agreed by each Client of the RIB.

Use of UNAs to Facilitate Issuing of Client Contracts and Other Uses

43. The process for use of the "UNA" mnemonic in Give-Ups is set out below, particularly at paragraphs 50 to 60. The Exchange acknowledges that Members use the "UNA" mnemonic other than in connection with the registration of Give-Ups. For example, UNAs are used in connection with the registration of Client Contracts, in circumstances other than those involving the facilitation of Give-Up trades. Such use of the "UNA" mnemonic is permitted, provided that:

- (a) Members comply with their obligations under Regulation 3.3 of the Trading Regulations and the provisions of the Clearing House Rules regarding the allocation of positions to the relevant position-keeping account at the Clearing House;
- (b) it is the sole responsibility of the Member to ensure that it allocates positions in respect of Contracts to an appropriate position-keeping account at the Clearing House to enable the Member and its Client(s) to comply with any applicable legal or regulatory requirements and/or any contractual obligations; and
- (c) such use is permissible under, and consistent with, the broader requirements set out in these Matching Rules and the LME Rulebook (in each case as amended from time to time).

Details of Certain Business Processes

Financing

44. The Financing trade category is used for financing transactions where the prices are likely to be away from the prevailing current market price. Under MiFID II, securities financing transactions are not considered to be reportable transactions. Therefore, the use of the Financing trade category will not result in any transaction reporting obligations, provided the transaction itself meets the following criteria:
- (a) a repurchase transaction – involves selling a commodity and agreeing to repurchase it in the future. The transaction must be governed by an agreement to transfer commodities, or guaranteed rights relating to title to commodities subject to:
 - (i) the seller can only transfer or pledge a particular commodity to one counterparty at a time;
 - (ii) the seller must agree to repurchase them, or substituted commodities of the same description; and

- (iii) the seller must agree to repurchase them at a specified price on a specific future date; or
 - (b) securities or commodities lending and securities or commodities borrowing – where a counterparty transfers commodities subject to a commitment that the borrower will return equivalent commodities on a future date or when requested to by the transferor; or
 - (c) a buy-sell back transaction or sell-buy back transaction – where a counterparty buys commodities, or guaranteed rights relating to title to commodities, and agrees to sell them (or commodities/guaranteed rights of the same description) back to the other party at a specified price on a future date. A sell-buy back represents the other side of the transaction; or
 - (d) a margin lending transaction – this only applies to securities, not commodities.
45. Historic Price Carry submission would be effected via the Financing Trade Category. Historic Price Carry trades are used to roll or carry forward an existing Client Contract to a valid Prompt Date on the basis of the original contract price between the same Members. Notice 99/484 : A472 : R034 ('RULES ON HISTORIC/ORIGINAL PRICE CARRIES') remains in force.

Give-Ups

46. Give-Up trades must be registered in the Matching System in relation to a trade that is concluded on any Execution Venue. Within 10 minutes from the time of Execution of the Client order, the executing Member must enter a Give- Up Executor trade half. For trades Executed on LME Select, Give-Up trades may be submitted to the Matching System with the venue code "Select". For any non-electronic trade, Give-Up trades shall only be submitted to the Matching System with the venue code "Inter-office".
47. Where the executing Member knows the identity of the Give-Up Clearer at the time at which it enters the Give-Up Executor trade half, the executing Member may register the Give-Up Executor trade half directly to the Give-Up Clearer. In

this scenario, the executing Member must include the Give-Up Clearer's mnemonic in the counterparty field.

48. However, in order to facilitate Members' compliance with the 10 minute window mentioned above, Members may elect (but are not obligated) to use the process set out in paragraphs 50 to 60 below (the "**UNA process**"). Members may use this process whether or not the Clearing Member is known at the time of the Execution of the Client order, and for business that is executed on any of the LME Execution Venues.
49. Where an executing Member uses the UNA process, the executing Member must enter the member mnemonic "UNA" in the counterparty field. In both the trade to fulfil the Client order and the Give-Up Executor trade the account should be entered as "H".
50. The submission of the Give-Up Executor trade half into the Matching System will automatically generate a Give-Up Clearer trade half, with an account field of "U". This will create a matched trade that will be submitted for clearing, resulting in a cleared trade. This will lead to equal and opposite positions on the executing Member's H and U accounts.
51. Where the Clearing Member is known, the executing Member may then cancel or reverse the cleared trade by following either of the steps outlined in paragraph 52 below. When the Clearing Member has been advised in due course by the Client that the executing Member has filled his order, the Clearing Member will then enter a Give-Up Clearer trade half to the Matching System.
52. Where the executing Member has been advised of the Clearing Member to whom the trade should be given-up to for clearing, then the executing Member may do one of the following:
 - (a) Cancel the cleared trade that was created through the system- generated Give-Up Clearer trade half with the UNA member mnemonic, and submit a Give-Up Executor trade half with the now known Clearing Member mnemonic in the Counterparty field, with an appropriate Client reference where known; or

- (b) Reverse the original Give-Up Executor trade half with the UNA member mnemonic, and submit a Give-Up Executor trade half with the now known Clearing Member mnemonic in the Counterparty field and with an appropriate Client reference where known.
- 53. When the Give-Up Executor enters their reversal half trade, then a new matched trade will be created, but with the original trade date/time retained.
 - 54. If the executing Member chooses to follow (a) above, then they must ensure that the Give-Up Executor trade half that contains the Clearing Member mnemonic also includes such information that allows for it to be identified as being related to the original cleared trade. In this regard, Members are reminded of the general obligation to ensure that they maintain a full audit trail for all orders, trade and post-trade operations.
 - 55. For both (a) and (b) the Execution Time of the Give-Up Executor trade half must be the same as that entered on the original cleared Give-Up Executor/Give-Up Clearer trade.
 - 56. Where the details of the original trade have changed – e.g. Prompt Date, price, volume – then the executing Member may again choose to follow either (a) or (b) as above. However, in these circumstances the Execution Time of either the Give-Up Executor trade half must be the time at which the amended details of the trade were agreed with the Client.
 - 57. Members are reminded of the need to ensure that orders which are to be given-up to other Members for clearing, are done so in a timely fashion, and that it is the responsibility of all Members, executing and clearing, to ensure that they, and their Clients recognise the importance of transmitting any Client instructions and processing this business as swiftly as possible.
 - 58. Where it has not been possible to effect a give-up on trade date (“T”), then the Cleared Trade, created through the submission of the Give-Up Executor trade half and the system-generated Give-Up Clearer trade half, will be processed by the Clearing House together with all other Cleared Trades in accordance with the Clearing House Rules.

59. Regulation 2.11 of Part 3 of the Rules requires Members to comply with, amongst other things, the timing requirements for the processing of Give-Ups. The deadline for processing Give-Ups that have not been processed on T, is 10:00 (London time) on T+1. This is to be achieved by the executing Member reversing the original Cleared Trade, and then submitting a Give-Up Executor trade half in the same manner as the original trade half, with the Trade Date and Time being the original time at which the Client order was executed. However, Members should be aware that they may be required to provide the Exchange with such additional information as the Exchange may request from time to time to demonstrate why it was not possible to process the Give-Up on T.

OTC Bring-Ons and Backloading

60. The OTC Bring-On category may be used where a Member has:
- (a) Entered into an over-the-counter contract with another Member;
 - (b) Agreed with that other Member a Contingent Agreement to Trade pursuant to which the parties agree to submit transaction details reflecting the terms of the over-the-counter contract.
61. An Agreed Trade that is submitted with the OTC Bring-On category shall therefore be treated in the same way as any other Agreed Trade made in the inter-office market.
62. It is the responsibility of the Members that are counterparties to the original over-the-counter contract to take any action that may be necessary to terminate or cancel such contract when the Agreed Trade represented by the Contingent Agreement to Trade is Executed. Neither the Exchange nor the Clearing House shall have any responsibility or liability to any person in respect of the original over-the-counter contract.
63. The Clearing House may offer services to enable Members to clear through the Clearing House Cleared Contracts representing multiple, previously executed, over-the-counter contracts (an "**OTC Backloading Service**"). Such services shall be governed by the terms of any agreement pursuant to which the Clearing House and/or the Exchange makes such services available. Such contracts shall be input into the Matching System pursuant to a Contingent Agreement to Trade, in the same manner as an OTC Bring-On, save that the particulars of the Contingent Agreement to Trade shall be determined pursuant to the OTC Backloading Service. The Exchange shall treat any Agreed Trade submitted to the Matching

System resulting from an OTC Backloading Service in the same manner as any other Agreed Trade represented by a Contingent Agreement to Trade agreed in the inter-office market.

64. The OTC Bring-On trade category may only be used to exchange a pre-existing over-the-counter transaction for a Cleared Contract. All OTC Bring-On transactions must comply with the following requirements:
- (a) the over-the-counter transaction must:
 - i. have been booked by both counterparties to the transaction;
 - ii. be booked within their trading systems; and
 - iii. be documented as such; and
 - (b) the trade date of the original over-the-counter transaction must be prior to the trade date of the OTC Bring-On.

OTC Take Off

65. The OTC Take Off category may be used to convert a Client Contract to an OTC contract. Cleared Contracts that are not Client Contracts cannot be taken off exchange.
66. For each contract taken off exchange the member must be able to provide full details of the relevant Client Contract. The OTC Take Off created must be for the same contractual commitment as the original Client Contract.
67. Member must maintain a full audit trail for the OTC Take Off transaction including the client instructions to take each trade off exchange.
68. Neither the Exchange nor the Clearing House shall have any responsibility or liability to any person in respect of the over-the-counter contract.

Document Change History

Date	Version	Author(s)	Summary of Changes
Previous versions are not listed			
01 October 2021	2.0	Post-Trade Operations	Clarifications regarding eligible Basis Trades (LME Notice 21/161)
07 October 2021	2.1	Post-Trade Operations	Further clarification regarding eligible Basis Trades
TBC	2.2	Post-Trade Operations	Removal of LMEprecious provisions from the Matching Rules
27 April 2026	2.3	Inter-Office Trading	Amending department name; removal of SFPA-related rules; and an amendment to the “4-way” agreement and “commercial user” requirement in relation to Metal Position Exchanges
