Alert Threshold Levels*

Level	Percentage utilisation of the limit value
Amber	≥75%
Red	≥90%
Red (Limit Reached)	100%

*Not applicable to Per Order Quantity and Per Order Notional Value

Limit Calculations

Limit Type	Description
Per Order Quantity	The amount of lots per order (monitors both long and short orders)
Per Order Notional Value	The total notional value: Outrights - (lots x tonnes x price) per order Strategies - (lots x tonnes x highest leg price) per order
Gross Quantity	The total amount of lots submitted through-out the day (monitors both active long or short orders and trades)
Gross Long Quantity	The total amount of lots submitted through-out the day (only monitors long future outright orders and trades)
Gross Short Quantity	The total amount of lots submitted through-out the day (only monitors short future outright orders and trades)
Net Long Quantity	The total amount of lots submitted through-out the day (monitors long orders and trades minus sell trades)
Net Short Quantity	The total amount of lots submitted through-out the day (monitors short orders and trades minus long trades)

Throttles

The LME will offer both FIX and binary order entry sessions (ComplIDs) with different throttle rates. The rates available will be 5, 20, 40 and 60 messages per second ("mps").

<https://www.lme.com/en/Trading/Access-the-market/Fees>

Order Entry

Incoming message rate per ComplID per second*	60
--	----

*Maximum order submissions, amendments and Security Definition Requests

Security Definition Request

Incoming message rate per ComplID per day	75
--	----

Member Order Entry Throttle

Member maximum message rate	6000
--------------------------------	------

System Protection

Order threshold value	200
Security Definition threshold value	200

PTRM

Message	Usage	Message rate per second	Message rate per day
Party Details Definition Request (CX)	Configure risk groups and end clients	100	500
Party Details List Request (CF)	Snapshot of risk group and end client configuration and status	2	100
Party Risk Limits Definition Request (CS)	Modify risk limits	500	10000
Party Risk Limits Request (CL)	View risk limits set and current utilisation	6	100
Party Action Request (DH)	Initiate kill switch and reinstate following a kill	100	10000

Version History

Version	Date	Change
1.0	13/02/2025	Initial release
1.1	20/02/2025	Nickel TAR order book removed
1.2	07/03/2025	Addition of PTRM calculation definitions
1.3	19/03/2025	Update of Exchange PTRM values
1.4	08/07/2025	Change TAR to TAS, add TAS 3M orderbooks for 6 key base metals Add instrument retention info for CRDS / carry SDR requests
1.5	14/05/2026	Added Autocross and additional auto-listed carries
1.6	19/10/2026	Added Self-execution prevention and HS product details
