The London Metal Exchange

Setting the global standard

The London Metal Exchange is the world centre for the trading of industrial metals. The majority of non-ferrous on-exchange business is conducted on our markets. And with the introduction of gold and silver, as well as steel scrap and rebar, our metals coverage is wider than ever.

The LME brings together participants from the physical industry and the financial community to create a vital, robust and regulated market where there is always a buyer or seller, where there is always a price and where there is always the opportunity to transfer or take on risk – 24 hours a day.

Investors value the LME as a vibrant futures exchange but also for its close links to industry. The possibility of physical delivery via the world-wide network of LME-approved warehouses makes it the perfect hedging venue for industry and the world gains a reference price they trust.

The Exchange provides producers and consumers of metal not only with a physical market of last resort but also, perhaps most importantly of all, with the ability to hedge against the risk of rising and falling world metal prices.

It's what we've been doing since 1877.

Price risk management

The perfect hedge

The LME is a meeting place of buyers and sellers of metal futures. It provides producers and consumers of metal around the world with the best way to manage their exposure to the risk created by metal price volatility.

Producers (those who sell the metal they mine and refine) are at risk of prices falling, and consumers (those who buy and make things from metal) are at risk of prices rising.

Hedging against these price movements using the LME's futures and options contracts enables the metal industry to focus on their core business.

Benefits of hedging

- Protect against price movements
- Lock in margins and offer long-term fixed prices to customers
- Improve budget forecasts
- Turn inventory into cash or security for finance
- Protect physical inventory against price falls
- Hedge physical purchases in times of production difficulty.

The world's price formation venue

What's in a price?

The LME is the de facto price formation venue for industrial metals. The prices 'discovered' on our platforms are used as the global reference and basis for physical trading as well as in the valuation of portfolios, in commodity indices and metal ETFs.

Our prices are trusted because the LME is the most liquid and most traded industrial metals market in the world and its global network of warehouses ensures the price is truly reflective of supply and demand.

Real-time bid and offer prices are available 24 hours a day via approved data vendors including LMElive. The LME also aggregates and publishes a set of reference prices that are based on highly liquid periods of the trading day.

The LME is also home to the LBMA Platinum and Palladium Prices, which are discovered in a twice-daily auction.

This pricing solution is delivered via LMEbullion, our custom-built electronic platform.

LME Reference Prices

What are they and how are they calculated?	How are they used?	Prompt dates	When are they published?	Currency
--	--------------------	--------------	--------------------------	----------

LME Official Price and Official Settlement Price

The LME Official Price is the last bid and offer quoted during the second open-out cry (or Ring) session and the LME Official Settlement Price is the last cash offer price	The LME Official Price is used as the global reference for physical contracts and the LME Official Settlement Price is the price at which all LME futures are settled	Cash, 3 month and 3-forward December prices* (which roll annually)	12.20 - 13.20	USD (we also publish exchange rates for EUR, GBP, JPY)
---	---	--	---------------	--

LME Unofficial Price

The LME Unofficial Price is the last bid and offer quoted during the fourth Ring	The LME Unofficial Price is a good indicator of afternoon trading and is used as a reference price	Cash, 3 month and 3-forward December prices* (which roll annually)	15.30-16.15 (ex minors)	USD
--	--	--	-------------------------	-----

LME Closing Price (or Valuation)

The LME Closing Price (also known as the Evening Evaluation) is determined by the LME Quotations Committee after the close of trading on the Ring	Used by LME Clear and LME members for calculating margins	All prompt dates	LME Indicative Closing Price: from 16.15. LME Provisional LME Provisional Closing Price from 16.35. LME Closing Price: from approximately 18.15	USD, EUR, GBP, JPY
---	---	------------------	--	--------------------

LME Asian Reference Price

The LME Asian Reference Price is calculated on the volume-weighted average price (VWAP) of trades transacted on our electronic trading platform, LMEselect, between 06.55-07.00 or 07.55-08.00 during British Summer Time (BST)	The LME Asian Reference Price provides traders with a useful early-day guide to trading in one of the most significant and liquid periods of the day	3 month LME Aluminium, LME Copper and LME Zinc	07.03 (08.03 BST)	USD (we also publish exchange rates for EUR, GBP, JPY)
---	--	--	-------------------	--

*15 and 27 month Official, Settlement and Unofficial Prices ceased April 2012

Warehousing, branding and price convergence

The physical market of last resort

Our market complements the physical. The possibility of physical delivery – supported by about 600 international storage facilities and listed brands – results in price convergence ensuring our prices remain in line with the physical industry.

The combination of price convergence, the global reach of the LME's storage facilities and listed metal brands, the fact that physical deals are negotiated using LME prices and our unparalleled levels of liquidity means the world gains a price it trusts.

In times of extreme shortage or over supply the LME also provides producers and consumers with a physical market of last resort. LME warehouse companies must meet strict criteria before they are approved and are typically located in high-consumption areas or logistical trading hubs for the shipment of material.

All metals stored in LME-approved storage facilities on warrant are LME-approved brands from LME-approved producers ensuring conformance to the Exchange's strict rules on commodity grade, quality and shape.

635

LME-approved storage facilities across
34 locations in 14 countries

575

LME-approved brands from 64 countries

5.5

million tonnes delivered in and out in 2016

What is a 'future'?

A 'future' is the obligation to buy or sell a standard quantity of a specified asset (metal) on a set date, at a fixed price agreed today.

What is an 'option'?

An 'option' is the right, but not the obligation, to buy or sell a futures contract at a price (the strike price) agreed today.

What are 'prompt dates'?

The date by which an LME warrant must be delivered by the seller and paid for by the buyer of a futures contract. Also known as the 'settlement date'.

The contracts and the metals Today's innovation, tomorrow's standard

Of the industry for the industry, the LME's products and services are designed with the metal community in mind and this is what makes the LME unique.

The LME prides itself on the unique settlement-date structure of its contracts and its focus on the physical market.

Designed to reflect the nature and timing of bilaterally negotiated metal trades, market participants can use the LME's contracts to transfer or take on risk against metal prices daily out to 3 months, weekly out to 6 months and monthly out to anything up to 123 months – that's over 10 years in the future.

Through our flexible prompt-date structure, large lot sizes that reflect industrial usage, and range of contract types the LME provides participants with unparalleled opportunity to transfer and take on risk.

What are 3rd Wednesdays?

3rd Wednesday contracts are monthly futures that exist within the current prompt date structure for all major LME contracts. The overall contract specification (trading times, contract size, and physical delivery) are exactly the same as the 3 month contract, or any other prompt date. The key difference between the 3rd Wednesday and any other prompt date is that it does not expire every day. It only expires on the 3rd Wednesday of that month. Therefore, it is a monthly future.

Types of LME contracts

LME futures

Physically settled contracts daily out to 3 months, weekly out to 6 months and monthly up to 123 months. Second business day prompts from four months, out up to two years recently added

LME traded options

American-style monthly options up to 63 months

LME TAPOS

(traded average price options)

Asian-style monthly average-price options up to 63 months

Monthly Average Futures

A contract where the difference between the 'fixed' price and 'floating' Monthly Average Settlement Price (MASP) is financially settled

LME gold and silver futures

Physically settled, loco London futures daily (including spot) out to 25 days, monthly out to two years and quarterly out to five years

LME ferrous futures

Cash-settled, index priced futures monthly out to 15 months

LMEminis

Small-lot, cash-settled monthly futures out to 12 months

London Mini Futures

Small-lot, cash-settled monthly futures traded on HKEX, traded and priced in renminbi

Trading

Unparalleled opportunity to transfer or take on risk

Metal futures and options are traded on three platforms at the London Metal Exchange.

Participants wishing to trade on the LME must do so with one of our member firms.

This can be done either directly with an LME member or through member sponsored access to LME's electronic trading platform.

Counterparty risk is mitigated by LME Clear, our own clearing house. As a Recognised Investment Exchange, the LME has a statutory requirement to ensure that business on our markets is conducted in a fair and orderly manner, providing proper protection to investors. The LME is regulated by the Financial Conduct Authority (FCA). The FCA also regulates those LME members that conduct investment business.

Trading platforms at LME

The Ring | Trading hours: 11.40 – 17.00

Open-outcry trading floor. Liquidity is concentrated into five-minute sessions known as Rings. LME Official, Unofficial and Closing Prices are all, or in part, derived from trading activity on the Ring.

LMeselect | Trading hours: 01.00 – 19.00*

Electronic trading platform, for the trading of all LME contracts. Offers a range of advanced features all tailored to the LME's unique prompt date structure.

Inter-office telephone | Trading hours: 24 hours

Members' indicative quotes are distributed via the vendor network and can be executed by telephone.

For a full list of LME member firms, please visit our website lme.com/trading

LME Clear

Trade and clear in one venue

LME Clear is the clearing house designed and built specifically for users of the London Metal Exchange. It delivers innovative clearing and settlement services for traded transactions.

LME Clear is the central counterparty (CCP) for all LME clearing members and their trading activity. It provides a financial guarantee to every traded contract, acting as 'the seller to every buyer and the buyer to every seller'. In the event of a clearing member default, LME Clear will step in and manage the defaulting clearing member's outstanding risk positions swiftly and efficiently.

LMEmercury, LME Clear's revolutionary clearing system, allows members to monitor and assess the risk they are taking on in real time. This in turn means clearing members have more control over their business in key areas such as portfolio management, option expiry handling and reporting.

LME Clear regularly introduces new services to meet customer needs, with the introduction of a position transfer service, inter-prompt spread methodology, Trade Compression and accepting LME Warrants and Offshore Renminbi as collateral since the clearing house opened two years ago.

Other services

Education

The LME provides an extensive global programme of training courses for the metal and financial industries. Our popular introductory courses delivered in partnership with Euromoney Training, provide the opportunity to learn how to effectively manage the impact of price volatility through the use of futures and options.

We also offer more advanced courses and can create bespoke training programmes.
